CITY DOCUMENT No. 15

INAUGURAL ADDRESS OF THE MAYOR CITY GOVERNMENT OF 1904

TOGETHER WITH THE

- Annual Reports -

OF THE OFFICERS OF THE

City of Quincy

MASSACHUSETTS

FOR THE YEAR 1903

Press of Geo. W. Prescott & Son 1424 Hancock St., Quincy 1904

City Government, 1904.

Mayor,

CHARLES M. BRYANT.

DEPARTMENT OFFICIALS.

Commissioner of Public Works, CHARLES F. KNOWLTON.

City Treasurer, HENRY G. FAY.

City Clerk, HARRISON A. KEITH.

City Auditor, GEORGE A. SIDELINGER.

Chief Engineer of Fire Department, PETER J. WILLIAMS.

Chief of Police, JOSEPH W. HAYDEN.

City Solicitor, PAUL R. BLACKMUR.

Overseer of Poor, JAMES H. CUNNINGHAM.

Collector of Taxes, EDGAR G. CLEAVES.

City Physician, JOHN F. WELCH

City Messenger, HARRY W. TIRRELL.

City Engineer, HAMILTON FLOOD.

Inspector of Plumbing, JEREMIAH J. KENILEY.

Inspector of Milk, FREDERIC J. PEIRCE. Inspector of Meats and Provisions, FREDERICK E. GOSS.

Inspector of Animals, EDWIN P. HENDERSON.

ADMINISTRATIVE BOARDS.

Board of Assessors.

Meets every Monday and Thursday at 9 A. M.

Board of Sewer Commissioners.

Meets every first and third Monday at 7.30 P. M.

A. F. SCHENKELBERGER (1905), Chairman.

WILLIAM T. ISAAC (1907), Secretary.

THOMAS J. LAMB (1906).

Engineer,—E. W. BRANCH.

Park Commissioners.

GEORGE E. PFAFFMANN, Chairman.

FRED B. RICE, Secretary.

LUTHER W. GLOVER.

Managers of Public Burial Places.

Meets second Thursday of each month at 8.15 P. M.

CEPHAS DREW, Chairman, ALBERT W. FAY, JOHN Q. CUDWORTH, ALFRED O. DIACK,

JOHN L. JOHNSON, GEORGE T. MAGEE, Clerk.

Superintendent,-JAMES NICOL.

Board of Health.

JOHN S. GAY, Chairman.

THOMAS J. DION, Clerk.

WILLIAM E. BADGER.

Inspector,—EDWARD J. LENNON.

Board of Examiners of Plumbers.

JOHN S. GAY, Chairman. WARREN S. PARKER. WILLIAM A. BRADFORD.

Trustees of Thomas Crane Public Library.

Meet first Wednesday of month at 7.30 P. M.

ELLERY C. BUTLER, Chairman. HARRISON A. KEITH, Secretary.

GEORGE W. MORTON, Treasurer.

HARRY L. RICE, HENRY McGRATH, CHARLES R. SAFFORD.

Managers of Adams Academy.

WILLIAM EVERETT, WALTER S. PINKHAM, JOHN A. BERNHARD,

LUTHER S. ANDERSON, GEORGE B. DEWSON, JOSEPH M. SHEAHAN,

Managers of Woodward Fund and Property.

CHARLES M. BRYANT, Mayor.

HENRY G. FAY, City Treasurer.

HARRISON A. KEITH, City Clerk.

GEORGE A. SIDELINGER, City Auditor.

RICHARD R. FREEMAN, Elected by Council.

Mayor's Inaugural Address.

January 4, 1904.

CHARLES M. BRYANT.

Gentlemen of the City Council:

Inasmuch as you meet regularly throughout the year and in special session whenever the executive has occasion to call you together, I do not believe in an extended inaugural address at this time.

I should much prefer to close these proceedings, after submitting to you a statement of our financial condition, with a few words of greeting, and later send to you for your consideration, recommendations and reports bearing upon such subject matters as then need your immediate attention. But custom has decreed that the Mayor, in an inaugural address on this day, shall at least outline something of his policy for the ensuing year; therefore I will at this time touch on certain matters which in my opinion you can consider with profit to the city and I will also give you information on certain other matters which may be of interest to you.

FINANCIAL CONDITION.

I fully realize that our financial condition is the subject uppermost in your minds as well as the minds of all our citizens and I regret very much that inauguration day coming so soon after the first of the year does not enable me to submit to you such a detailed report of our financial situation as I should like to give to this Council. The Treasurer's and Auditor's reports will, however, give you additional information later, and I will now read to you the statement usually furnished at this time.

You will observe that the total increase for current expenses during the past year over those of the preceding year was \$8,633.63. This includes the Sewer and Water departments, as well as all other departments of the city.

The increase in the total amount of loans issued, of every character, was \$13,937.65 and this includes the last loan made by the Council of 1903 of \$10,500 for the Atlantic schoolhouse lot, which was really made the first day of this year, though dated December 1st of the last year. Were it not for the two loans aggregating \$80,000, which we were obliged to negotiate to provide ready money to meet expenses, there would have been for this city an almost unprecedented net reduction of the city debt on the first day of January.

In view of all that has been said and published on this subject, it seems almost unnecessary for me to go into any extended explanation of why we had to borrow money to the extent which we did for current expenses. Perhaps it is sufficient to say that the principal reasons were that we couldn't collect our back taxes soon enough and that we didn't borrow enough money, and for a long enough time, in anticipation of the taxes for the year just passed. These are the principal reasons, undoubtedly, but added to these were other conditions which brought about a combination of circumstances which no other administration has been obliged to face. This year we were obliged to make good all balances in the treasury for construc-

tion accounts and no new construction loans of any importance were made to take their place. Heretofore it has been the custom for the City Treasurer to use whatever balances there were in the bank, not immediately needed for the purpose for which the appropriations were made, to make up the amount needed for current expenses, and to replace the amounts used when the back taxes were received. The contention has been that it was not wise to borrow money for current expenses, as many cities do, when there was cash in the bank not immediately required for other purposes. This method has worked all right in other years, and, I believe, has resulted in a saving of interest to the city. I am free to confess, however, that I do not altogether like it and should prefer to see the city carry a larger cash balance on hand if there is a legal way of doing it. I trust, however, that you will not conclude, either from what you have heard or from what I have said, that we have not ample cash assets with which to pay all debts incurred for running expenses.

There was due us January 1st from taxes of the last four years only, together with cash in the treasury and receipts available, over \$280,000. The notes and loans referred to amount to \$260,000; the leeway being more than sufficient to make good all balances for construction appropriations and such bills as were not presented January first. This does not take into account as assets any of the taxes due the city for the years between 1894 and 1900. There are enough of these taxes which will be collected, eventually, to offset at least abatements and uncollected taxes of the four years just past.

It is perfectly obvious to you, however, that we cannot hope, even with most strenuous efforts on the part of the Tax Collector, to get in all of these back taxes this year, so that probably it will be necessary either to carry over one of these municipal loans into next year or make a new one. It is my present intention to push the collection of taxes this year to an extent never before attempted, and I expect the balance uncollected for the years previous to 1904 will on December 31st next be the smallest in the history of the city.

Personally I am much pleased that this question has come to a head during my term of office. If strenuous methods are

necessary to put the city in a better financial condition, I am ready to undertake them. The discussion which we have had on this subject will strengthen the hands of this administration to compel the payment of taxes at an earlier date than heretofore. I am in favor of abating all those taxes not collectible of the early years of the city government, which, in my opinion, should have been abated by the Assessors or collected by the Collectors long before my administration came into office.

I promise you that I will make a most careful study of the city finances this year, and I expect to receive your co-operation and assistance to the end that we may bring the city up to date with the most advanced in Massachusetts in the matter of municipal bookkeeping.

On January first, 1904 our borrowing capacity was \$33,240.15; this has since been increased, by the payments made on our debt, to \$35,190.15 and in February will be still further increased \$30,000.

The amount which we can this year assess for current expenses under the law enabling us to raise \$12 per \$1000 of the Assessors' valuation for the preceding year, less all abatements to December 31st, is \$275,316.

WATER DEPARTMENT.

It is a pleasure to note that the liberal policy of the Councils of past years in making appropriations for the extension of water mains has proved to be the very best kind of financial policy.

In the past four years, by reason of these extensions, we have been enabled to obtain 1437 new consumers and our revenue has increased approximately \$8,000 per year.

Not only have the individual takers on these new lines been benefited in health and comfort by having an ample supply of pure water, but hydrants have been erected along the lines, giving greatly increased fire protection to our ever increasing property.

A large number of fire hydrants adds to the efficiency of the Fire Department and is something which is of benefit to the City as a whole, and I believe that in the interest of better fire protection, and also as good business policy, it would be wise for this Council to continue to make liberal appropriations for further extensions of the water system.

In the past the city has lost a considerable amount of revenue from the fact that the ordinance relating to the collection of the water rates has not been strictly enforced. I realize that to efficiently enforce this ordinance we must necessarily make the head of the Water Department an unpopular man, but the business interests of the city are para-If the rates are not collected in advance mount to popularity. in accordance with the ordinance, and property changes hands, it is often impossible to collect back rates from the new owners, and from this fact many hundreds of dollars are lost to the city. This year we have taken strenuous methods to collect water rates and to enforce this ordinance, and the Commissioner of Public Works has shut off the water, irrespective of who the householder might be, when the bills were not promptly paid. As a result of this policy, the city during the past year has collected to Dec. 31, 1903, from water rates the sum of \$86,000, the amount of uncollected rates being smaller than in any year since the city purchased the works. The coming year I shall insist that the ordinance be as strictly enforced and all water will be turned off unless the bills for the same are paid on or before February 10th.

The Metropolitan Water Board have been asked to make a report to the Legislature about restricting the waste of water and compelling the use of meters in the Metropolitan District. If the Legislature takes any action upon this matter this year, it is very likely that I shall ask the Council to enact some additional ordinances with a view to carrying out the law which we expect the Legislature will pass.

I would suggest that the care of the hydrants be considered by the Council. Under the present ordinance hydrants are supposed to be cared for by the Fire Department, but the appropriation given to the Fire Department for this purpose is insufficient to do the work properly. As a result, the hydrants get sadly out of repair and then the Water Department is obliged to put them in repair, the expense of which is taken from the appropriation for construction. I believe this to be wrong and I recommend that the Water Department be given a

sufficient appropriation to enable it to care for and repair hydrants, and that the ordinance regulating this matter be so changed that the responsibility in the future will be placed upon the Commissioner of Public Works to care for and maintain the hydrants.

I desire at this time to call your attention to the fact that considering the amount of business done by the Water Department, namely, that it has nearly doubled in the past five years while the cost of maintenance has not materially increased, great credit should be given to Mr. Knowlton, the Commissioner of Public Works, for the efficient and economical manner in which he has managed the affairs of this Department.

POLICE DEPARTMENT.

The Police Department is entitled to praise for the good work it has done during the last year. The addition made in the number of patrolmen has greatly increased its efficiency, and I would recommend to the Council that the force be still further increased by the addition of one or more patrolmen. In my opinion there should be an additional man on duty in the Square. At present, the business district is unprotected during certain hours of the morning. With an additional patrolman, the men assigned to this locality could so arrange their hours of service as to adequately protect the district during the whole twenty-four hours of the day.

The signal service system, supplemented by the patrol wagon, has been of the greatest assistance to the Department. It is, however, necessary to install three new police signal boxes, one to be located on Liberty Street, near the large brick block at the junction of Brooks Avenue, one on Granite Street near Mr. Swithin's shed and one on Adams street, near Whitwell Street. I have obtained information concerning the cost of installing these boxes, and I am informed that the amount required would be \$1,115. I therefore ask the Council to appropriate this amount for that purpose as early as possible, so that this Department may have the full benefit of these boxes at once.

BOARD OF HEALTH.

We have been very fortunate the past year in being free from epidemics of smallpox and other contagious diseases, and although our pest house has been ready for occupancy at all times, we were not obliged to use it. The construction of this hospital, however, by the city was, in my opinion, a wise investment.

The question of properly and efficiently cleaning vaults and cesspools has not as yet been solved in a satisfactory manner, nor do I believe we will get good results until the city does this work. I propose to again ask the Council to consider this matter in all its bearings and at the same time consider the subject of the collection of ashes.

From our experience in the past, I do not believe it advisable to make long contracts on behalf of the city with any person as Public Scavenger. On the other hand, I am of the opinion that no person can contract to do this work properly without the expenditure of a large sum of money to obtain the necessary equipment, which is special in its character; therefore they cannot afford to make a contract which is not for a term of years. Furthermore, the prices which have been obtained in the past for doing the work of both cleaning cesspools and vaults have not been sufficient to enable the contractors to do the work in all parts of the city thoroughly and efficiently and yet make a fair profit.

The sewerage dumping tanks now in use have proved their worth and are all right so far as they go, but they were not designed or intended to care for vault matter containing stone chips, ashes, tin cans and refuse of a like character. For such materials a dump should be provided, and whether the premises be located far from or near to this dump, all matter taken from the vaults unsuitable for the tanks, should be carried to the dump established.

I believe that this work would be more conscientiously and efficiently performed by the city employes under the direct supervision and control of the Board of Health than by any contractor. With the sewerage tanks taking care of all the cesspool and liquid matter, the comparatively small portion of vault matter handled could be easily disposed of without offense to

the persons residing in the locality where the dump was established.

I would suggest, therefore, that an appropriation be made at once in order to enable us to purchase the necessary outfit referred to, and that an ordinance be passed establishing a schedule of prices to be paid by househoulders for cleaning vaults and cesspools, all the work to be placed under the charge of the Board of Health. After the initial expenditure for the outfit, and an additional small appropriation for the running of the department the first year, the department would, in my opinion, be self-supporting.

In regard to the collection of ashes, I deem it would be best to place this under the charge of the Commissioner of Public Works. He could handle this work in connection with the Street Department, and with the teams of that department could do the work more economically than the Board of Health.

Although I regret to suggest anything which will increase our running expenses, I believe that an appropriation of approximately \$1,500 per year for the collection of ashes would result to the advantage and convenience of our citizens sufficiently to warrant the expenditure.

STREET DEPARTMENT.

In view of the finances of the city, I believe the Council should not make any appropriation for special work on streets unless it becomes absolutely necessary. There are portions of certain streets which should be paved each year. There are also a number of new streets which should be built and accepted to keep up with our steady development and increasing population, but before any of these improvements are undertaken, additional accommodation should be provided for the High School, the needs of which are most imperative.

The past year has seen the completion of the new iron bridge across the Weymouth Fore River. This bridge was built by the County Commissioners under an act of the Legislature, and three commissioners will soon be appointed to assess the cost on the cities, towns and corporations which are found by this commission to be benefited. The maintenance of the old

bridge was formerly paid by the towns of Hingham and Weymouth and the city of Quincy, the city's proportion being five twenty-fourths.

Believing that the care and operation of this bridge should not be borne by the people of Hingham, Weymouth and the towns surrounding, but rather by the State, we have caused petitions to be made to the Highway Commission asking that they take charge of the bridge on behalf of the State, and although they have not seen their way clear to do this, I shall do what I can to get the Legislature to authorize the Board of Highway Commissioners to take the bridge under their control.

I regret to say that the Hancock Street bridge at Atlantic, over the railroad tracks, has not yet been constructed, but we have pushed the matter during the year and have got to a point now where three commissioners have been appointed to determine who shall do the work and to apportion the cost of the bridge among the parties benefited. I feel now that I can say with confidence that this bridge will be completed during the spring.

I intend to use every effort in my power to bring about the further construction of parkways and boulevards in our city by the Metropolitan Park Commission.

I shall also make an effort to get the Highway Commission to take Randolph avenue, which is wholly within the Park Reservation, and I may be obliged to ask your cooperation to help along this work.

I called to the attention of the Council of last year the statute passed by the Legislature requiring cities and towns to pass regulations regarding the speed of electric cars and the use of tracks by street railway companies within the city limits. I regret that the last Council did not dispose of this matter, and I call your attention to the necessity of at once considering this subject and enacting an ordinance complying with the statute.

I regret also that the Councils in the past have not taken up and considered the subject of City Forester and Inspector of Wires. In a rapidly growing city such as ours the number of wires and poles in our streets increases greatly from year to year. If we expect to have anything left of our shade trees, it is of the utmost importance for the Council of this year to do something in the way of appointing a proper officer to give his entire time and attention to this subject.

In conclusion, I would say that our duties may often be difficult and perplexing. Let us bring to them the care and attention to detail which we should use in our own affairs. While we must encourage and assist in the development of the city, we should be conservative. Whatever wise thing we do in our management of the city affairs will surely redound to our own individual credit. We have selected Quincy as our abiding place; most of us will probably live here for a long time to come, and anything which we do in our public capacity will be better done if we have in mind what our fellow citizens will think of us in other years.

We shall now be brought closely in contact, and I look forward confidently to a year of harmony between the executive and legislative departments. Let each one of us give his neighbor credit for absolute honesty in his views and opinions on all questions and we shall reach the end of our service with mutual respect and satisfaction.

Treasurer's Report.

CITY TREASURER'S OFFICE, January 1, 1904.

To His Honor, the Mayor:

Herewith I submit the annual statement of the City Treasurer for the year ending December 31, 1903.

Quincy, Mass., Dec. 31, 1903.

I hereby certify that I have examined in detail the accounts of the City Treasurer; that all expenditures are supported by vouchers, regularly approved by the proper officials, and that the condition of the various accounts (including cash on hand and in banks) on the 31st of December, 1903, has been verified by comparison with the records of this office.

GEO. A. SIDELINGER,

City Auditor.

Report of the Commissioner of Public Works.

To His Honor the Mayor of the City of Quincy:

SIR: — Complying with the requirements of the City Charter I beg herewith to submit the fifteenth annual report of the Department of Public Works for the year ending December 31, 1903.

The City Council passed 72 orders for work connected with my department, such as special appropriations for streets and public buildings, location of poles and lights, preparing polling places, etc.

The expenditure authorized is much less than previous years, being only \$128,305.00.

The following table shows appropriations, expenditures and balances:

Annual Budget. A	PPROPRIATION.	EXPENDED.	BALANCE.
Bridges, culverts and drains	\$2,500 00	\$2,433 97	\$66 03

balance 1902	4,167 98	4,160 64	7 34
Botolph street grading			
(1901,)	500 00	499 94	06

For a detailed statement of expenditures I beg to refer to the report of the City Auditor.

The following is a short review of the work performed during the year.

BRIDGES, CULVERTS AND DRAINS.

Repairs were made as necessity demanded on Neponset bridge, Beale street bridge, Bates avenue bridge and the Fore River bridge at a cost of \$285.63.

All the brooks and water-ways were thoroughly cleaned in the interest of public health as well as permitting a free flow of surface water. The cost of this work was \$631. Catch basins and drains were put in on Chubbuck street, Squantum street, Webster street, Willard street, Quincy avenue, Canal street, Bigelow street, Elm street, Granite street, Adams street and Centre street.

The new iron bridge across the Weymouth Fore River is now completed and turned over to the trustees for maintenance and operation. An effort is being made to have the State bear this expense and if not successful a larger appropriation will be necessary for operating expenses. A large amount will be needed another year for repairing Neponset bridge.

STREET LIGHTING.

The contract between the city and the Quincy Electric Light and Power Co. for electric lights expired January 1, 1903. By the efforts of the Mayor and Council a reduction in the price was obtained and a contract for three years was entered into on July 1, 1903, at the following prices—\$71 per year for each arc lamp and \$17.50 per year for each incandescent lamp, to burn until 1 o'clock A. M. every night except on the night of a full moon and two nights preceding and succeeding the same, provided it is not cloudy.

The Citizens' Gas Light Co. do not seem to be able with their present plant to light street lamps satisfactorily and I would recommend that gas lamps be abolished and electric lamps installed in their places.

We have now in operation 162 arcs, 525 incandescents and 67 gas lamps, a gain of 32 arc and a loss of 12 incandescent lamps over last year.

REPAIR OF PUBLIC BUILDINGS AND CARE OF CITY HALL.

This appropriation was expended on city buildings as per following statement:

Expended on School Buildings for Repairs.

The Washington School building was completed and turned over to the School Board in October, 1903, and the old building was sold and torn down. Ward Two has now a well built and perfectly equipped school building with spacious grounds in which to take just pride.

The following is a statement of cost. The balance will be used the coming year for grading, which is not yet completed.

Appropriation		•		\$55,000 00
Architect's fee and inspection	•	•	\$3,023 12	
Building contracts		•	42,338 73	
Heating apparatus	•	•	5,323 79	
Furnishing	•	•	2,655 08	
Grading and miscellaneous	•	•	577 19	,
Expended	•			53,917 91
Balance	•	•		\$1,082.09

The Hose House at Houghs Neck was completed and turned over to the Fire Department early in April and fully answers the needs of that district.

Under a special order extensive repairs were made to the Willard School building. Two new school rooms were partitioned off and made to accommodate nearly one hundred additional pupils. The inside and outside of the building was painted, new wiring for electric lights and call bells put in and heating plant overhauled.

HIGHWAYS.

This appropriation was expended in the usual manner in the general care of streets and sidewalks and I believe that in spite of the smallness of the amount and the increase of traffic that there was an improvement in the condition over previous years.

Considerable work was done trimming trees, laying cross-walks, erecting street signs, cleaning and paving gutters.

4300 ton of broken stone was purchased for \$2400 from the contractors on the Adams street sewer and 4100 tons used on Washington street, Beach street and Adams street.

All the surplus dust from the Quincy Quarry Co. crusher on South street was purchased for \$200 and 790 tons used for repairing sidewalks and macadam streets.

3780 tons was quarried and crushed at the city plant on South street and used for resurfacing and repairing various streets.

The Metropolitan Sewerage Board completed the sewer in Adams street and allowed the city \$1,700.00 toward putting the street back in its former condition. This amount judiciously expended has given us an exceptionally good piece of road from Furnace Brook to the Milton line.

We have assurances from the Metropolitan Sewerage Board of financial assistance toward repairing Sea street to Houghs Neck and I hope the coming year to get that street back to its former excellent condition.

Penn street was extended and laid out as a public way 645 feet in length and 40 feet in width.

Federal avenue was accepted from Goddard street to Independence avenue 40 feet wide and 1,474 feet long.

Our total street mileage is now 74.7 miles.

From the appropriations made late in 1902, special work was done on Rock Island road, Hamilton street, Edison street, Newbury avenue and Faxon Park road and a granite watering trough placed at the junction of Quincy and Liberty streets.

Botolph street was rebuilt from a special appropriation of 1901, sewer construction preventing its being built earlier.

The special appropriations of this year for street improvements were few. \$200 for Independence avenue was expended in widening a part of the street to its full width.

The appropriations of \$200 for extending Penn street, \$1,000 for grading Federal avenue and \$6,000 for paving Willard street were not expended, the orders having passed too late in the year.

SEWER MAINTENANCE.

The sewers were flushed each month and thoroughly cleaned once during the year which has kept them in good condition, there being no stoppage of any kind throughout the twenty-two and one-half miles under my control.

A number of miles of sewer were completed by the Board of Sewerage Commissioners but have not yet been turned over to this department.

WATER DIVISION.

This branch of my department still continues to grow very rapidly and the income is increasing at the rate of nearly \$8,000 per year.

In the early part of the year we succeeded in getting all the old outstanding bills cleaned up to December 31, 1902, and at the close of this year all bills for water rates previous to July 1, 1903, except \$105.00 had been collected. The statement for the year being as follows:

Total assessment for water rates for 1903		\$87,382 66
Amount rebated for vacancies and non use of fixtures	\$3,377 21	
Amount due from premises shut off	•	
for non payment	$106 \ 06$	
Amount due from 1903 assessment.	3,595 82	
Amount collected on 1903 assessment	80,803 57	
		\$87,382 66
Amount collected on 1902 assessment	5,741 72	•
Amount collected on 1903 assessment	80,303 57	
Total amount collected for year ending		
December 31, 1903		\$86,045 29

The amount due for water rates on July 1, 1903, assessment was \$3,375.15 and amount due on assessment on new premises since July 1, 1903, was \$220.67, making total amount due on December 31, 1903, \$3,595.82. This amount will be considerably smaller from the fact that many of these premises were not occupied until some time after the assessment was made and many will cut out some fixtures so that large rebates will be necessary, but from the above it will be seen that collections have been brought up closer than ever before.

If the department was given credit for the amount of water used for municipal purposes a remarkably good showing would be made. Under present methods no charge is made for use of water in Schoolhouses, Engine houses, fountains, hydrants, street sprinkling, etc.

Under a private water company the city would be obliged to pay \$27,165.00 per year, divided as follows:

639 hydrants .			•		\$ 22,365	00		
9 fountains .	•	•		•	450	00		
13 Schoolhouses	•		٠	•	1,300	00		
6 Engine houses.		•		•	300	00		
Stable, Almshouse,	City	ha	11	and				
Police station					250	00		
Street sprinkling	•	•			2,000	00		
Street work and flush	ing s	ewer	S	•	500	00		
							\$27,165	00

Under the above condition the showing would be as follows:

T7				
14	00	01	pt	21 .
10		OI	PU	<i>。</i>

Water rates fr	om pr	ivate	'S	\$86,045	29				
Water rates f	rom c	ity d	epart	ment	S	27,165	00		
Mass. water si	nking	fund	1		•	498	60		
								\$113,708	89
Expenditures:									
Maturing bon	ds,	•	•		•	\$34,500	00		
Interest .	•	,	•	•	•	28,480	00		
State assessme	ent	•	•	•	•	30,237	42		
Maintenance	•	•	•	•	•	10,000	00		
						f		\$103,217	42
Total net prof	it	•	•		•			\$10,491	47

It will thus be seen that the department is on a substantial paying basis.

I again earnestly advocate the placing of meters on all taps as I believe it to be the only just and equitable way to sell water. Everyone should pay for just what they use and it is as absurd to charge for water by number of fixtures as it is for a Gas Company to charge for gas by number of burners.

The Metropolitan Water and Sewerage Board is now considering the matter and will make a report to the legislature and in all probability our supply will be metered in the future and our assessment based on actual consumption. Experiments have shown that on metered services a saving of the waste has reduced consumption 40 per cent. and over. In our case it would mean a reduction of 40 per cent. on our State assessment which is an item worth considering. Nearly all the cities in the country are adopting the meter system and I believe we should commence the coming year and make a substantial start in this matter.

A large number of extensions were made and wholly upon petitions and where six per cent. income was guaranteed. Nothing was done to close up dead ends or to improve the service by connecting circuits. On many streets larger mains should be put in and the question of more efficient service care fully considered the coming year.

The total number feet of pipe laid of every description was 47,350 of which 22,493 feet were street mains, making total length of street mains 94.87 miles.

We have now 5,327 service connections, 327 being put in the past year at a cost of \$11,920.75, the owners paying \$8,853.97 and the city \$3,066.78.

- 40 meters were set and 27 removed, leaving total in use 165.
- 37 hydrants were set and 5 removed, leaving total in use 639.
- 73 gates were set and 7 removed, leaving total in use 1154.
- 44 leaks were repaired in street mains and 16 in service pipes.
- 41 old services were renewed.

The receipts from water rates was \$86,045.29 and from construction \$12,229.03, making total gross receipts \$98,274.32.

The best of care has been taken of hydrants, gates, blow-offs, standpipes, reservoirs and equipment and the department stands today second to none in the country.

The following tables show miles of pipe and number of hydrants and gates, also location of pipe, hydrants and gates put in during the year.

In conclusion I beg to express my appreciation of the valuable assistance rendered me by His Honor the Mayor, the members of the City Council, the clerks, and the foremen and employees of the department.

Respectfully submitted,

CHARLES F. KNOWLTON,

Commissioner of Public Works.

Thomas Crane Public Library.

To His Honor the Mayor of the City of Quincy:-

The Trustees of the Thomas Crane Public Library submit herewith their annual report, it being the thirty-third of the whole series since the Library was opened.

The whole number of names now on the Library register since the new registration began in 1899 is 6,316, and of this number 1,028 were added during the past year. The number of books purchased during the year was 614, of which 553 volumes were credited to the foundation fund, or city appropriation, and 61 volumes to the income from the Cotton Center Johnson fund. These figures do not include the books loaned from the Bodley Club Library.

The call for later fiction being greater than the funds at the command of the Library can supply, the Trustees carried into effect in November last a plan whereby many more volumes can be loaned to borrowers while the popular novel is being talked about; namely, a subscription to the Bodley Club Library, which is owned by the Booklovers Library, although the central management has no control over the local membership. The books are clean and in the best of condition, are cased in neat cloth boxes of blue color, and are loaned to patrons of the Library on exactly the same terms as the books owned by it. One hundred volumes were put upon a new revolving bookcase in the reading room and in four days not one was to be found upon its shelves. much do the people seem to appreciate the privileges of this service that it is difficult to get twenty-five books to exchange each month at the central station at Philadelphia, although the whole one hundred might be exchanged. The service has been in operation too short a time as yet to give definite results, but if it proves so good a plan as it seems, the Trustees would feel justified in desiring to double the subscription.

One most desirable feature as far as the Library is concerned is that while a larger number of books is being supplied to read-

ers for the time being for the same expenditure of money, the shelves of the Library are not being crowded with books of simply passing interest. Thus, if less money is being spent for fiction, more may be spent upon the other and more permanent forms of literature.

During the year the Library has had on exhibition ten sets of photographs and prints of the Library Art Club, the most attractive and popular of which proved to be the charming colored photographs of Switzerland's scenery, children as well as adults being often found before the pictures during the three weeks the exhibit was at Crane Memorial Hall.

Cards for all books in the Library in the classes of Biography and History and the greater part of those of Travel may now be found in the Card Catalogue, contents being given under subjects. The juvenile Card Catalogue is largely patronized and nearly full, and it is not long, therefore, before a new and larger cabinet will be needed. The annual classified list of the preceding year was prepared for print and published early in the year.

The French estate has been graded and its incorporation with the grounds of the Library, together with the addition of trees and shrubbery, has greatly increased the attractiveness of the lawn. The statistics in connection with the Library will be found below.

All of which is respectfully submitted,

E. C. BUTLER,
GEORGE W. MORTON,
H. L. RICE,
CHARLES R. SAFFORD,
HENRY McGRATH,
HARRISON A. KEITH.

STATISTICS.

During the year 1903 the Library was opened 305 days; and the number of books loaned was as follows:

	HOME USE.	SCHOOLS.	TOTAL.	PER CENT.
Fiction,	30,478	82	30,560	37.9

Respectfully submitted,

GEORGE W. MORTON,

Treasurer.

Overseer of the Poor.

To His Honor the Mayor of the City of Quincy:

I herewith submit the annual report of the Poor Department for the year ending December 31, 1903. The appropriation was \$14,000.00; the receipts from the sale of coal and wood amounted to \$2,555.15; thus making the total amount available for the use of this department \$16,555.15. This amount will not be sufficient to pay the bills incurred during the year, and an additional appropriation will be necessary.

The receipts from all sources were \$4,273.72, of which \$2,555.15 was for the sale of coal and wood to relieve the distress due to the scarcity of fuel early in the year. The latter amount in no way helped the department, as far as its real work was concerned, as it was simply a case of using the appropriation first, for the purchase of coal, and then using the receipts for the purpose for which they were originally appropriated, as provided by an order of the City Council.

The total amount expended Dec. 31, 1903, was \$16,554.75, of which \$10,721.35 was for Outside Poor; \$3,278.25 for Almshouse, and \$2,555.15 was for coal relief.

The amount paid to the Hospital was \$633.00, which was for 1902 sick cases, and was paid from a special appropriation from the department receipts.

The cost of maintaining the insane will no longer be borne by this department, as on January 1, 1904, the State assumed full charge of all insane. The cost will be paid from the State Treasury, instead of directly to the institution from our City Treasurer, as heretofore.

The Almshouse remains under the management of Mr. and Mrs. George Wilson, who have in every way been satisfactory. During the year the walls and ceilings have been painted, and a

new boiler installed, so that the Almshouse is today in a condition such as has not been equalled in recent years.

I hope to provide some plan for the purchase and storage of all the coal used by this department during the year; the same to be bought at a time when coal is cheapest, and to be delivered by the department teams. This, I believe, will be for the best interests of the city, and should result in a considerable saving.

During the year, suit was entered against the town of Weymouth for the support of paupers relieved in this city, whose settlements were claimed in Weymouth. At the close of the year the case had not been reached, but will be tried early in 1904. The decision will be of great value in determining the settlement of married women living apart from, and not supported by their husbands.

During the year, in addition to the regular work of the department, I have investigated the settlements of nine persons, notice of whose sickness of contagious diseases was received by the Board of Health, and referred to this department, as provided by Chapter 213, Acts of 1902.

For many years it has been the custom of a certain class of men to use the Almshouse as a winter refuge. After working during the greater part of the year, and receiving good wages, which they spend as soon as they are received, they make application for admission to the Almshouse as soon as the severe weather sets in. I have taken such cases as I knew should be self-supporting, and have made complaint in the local court against them as vagrants. In each case they were sentenced to the State Farm. Such cases as these are common throughout the State, and can be handled only in the manner indicated.

JAMES H. CUNNINGHAM,

Overseer of the Poor.

Public Burial Places.

To His Honor the Mayor of the City of Quincy:-

The Managers of the Public Burial Places respectfully submit the following report for the year 1903.

The work of this department has been carried on successfully during the past year and within the appropriation allotted to it by the City Council. There have, however, been some orders for regrading that it was not possible to do this year for lack of funds. It is hoped that another year they may be undertaken. At the close of the year 1903 there was a small balance to the credit of the department, but this will be required to meet a few outstanding bills.

A very large proportion of the amount appropriated is expended for labor in care of lots, regrading, foundations, etc., for which a cash return is made. This is paid directly into the City Treasury. While some work must necessarily be done at the old Hancock cemetery, a large part of the work is performed at Mt. Wollaston cemetery, as the money can be expended to a much better advantage there.

During the past year sixteen lots have been sold at Mt. Wollaston. There are now but a few lots remaining in the cemetery, and it is self evident that a section of the new land, purchased for the enlargement of this cemetery, must be laid out soon.

Early in the year the attention of the City Council was called through Your Honor to the unsightly condition of the land about the main entrance on Sea street. The Board regrets that the City Council has not taken some action toward the improvement of this land.

The carrying out of the lawn plan has been continued and during the year six lots have been regraded, largely at the expense of the owners. It has been impossible, however, to do all the work in this line desired for lack of funds. The fall of the

year is the most favorable season in which to do this work, and if there could be some change made in the ordinances, so that the money received for regrading could be placed to the credit of the department, a large amount of work in this line could be successfully carried out.

During the past year nine lots have been taken under perpetual care, making the total number now under this form of care 138. Several other perpetual care deeds have been issued but the parties have not deposited the fee for them as yet. The fund held for this purpose now amounts to \$18,450.00. This sum is deposited in the National Granite Bank. The fund has now become so large that it seems unwise to have it deposited in any one bank. Just how this fund shall be invested is a problem that has been considered informally by the Board, but no definite conclusion has been reached. We are of the opinion that the incoming Board of Managers should take up the question at an early date.

There is little to be said about the old Hancock cemetery. There has been some work done here to make it presentable. During the year there have been a few burials in this cemetery. By order of the City Council the City Engineer has made a plan of this cemetery showing the graves and as far as possible the names of those buried here. This plan is something that has long been needed and will prove valuable in the location of graves of those who years ago took an active part in the welfare not only of Quincy but of the whole country.

Your Board is well satisfied with what has been done at Mt. Wollaston cemetery. It is becoming more beautiful every year and is certainly a credit to the city.

All work in the public burial places of the city has been carried on under the superintendence of James. Nicol, who has filled that position for several years and who continues to give satisfaction.

Respectfully submitted,

CEPHAS DREW, Chairman, GEORGE T. MAGEE, Clerk, JOHN Q. CUDWORTH, JOHNSON, WILLIAM T. SPARGO, ALBERT W. FAY.

Report of City Physician.

To His Honor the Mayor of the City of Quincy:

The following report of the City Physician for the year 1903 is respectfully submitted:

Visits to the sick of the Almshouse, thirty.
Visits to the sick of the outside poor, one-hundred and forty.
Calls to the Police Department, fifteen.
Attendance at District Court, twice.
Examination of applicants for Police Department, thirteen.
Examination of applicants for Fire Department, three.
Vaccinations and office calls, seventy-five.

JOHN F. WELCH, M. D.,

City Physician.

Report of the Chief of Police.

To His Honor the Mayor of the City of Quincy:

Sir: — In compliance with the City Ordinance I have the honor to present for your consideration the annual report of the Police Department for the year ending December 31st, 1903.

The whole number of arrests for the year has been eight hundred and thirty-five (835) against seven hundred and forty (740) for the year 1902.

Males,	799	Females,	36
Married,	306	Single,	529
Adults,	744	Minors,	91
Residents,	668	Non-residents,	167

The offences for which arrests have been made are as follows:

Ambulance calls		•	•	•	•	•	•	30
Miles run .	0	•		•	•	•		1,260

We have had an opportunity to test the working of the Sig. nal System for a full year, and it has proved to be a great benefit to the department in quick communication with the Station, and giving instructions to officers on their routes. It seems really indispensable.

SCHEDULE OF PROPERTY IN USE BY THE POLICE DEPARTMENT.

1 Signal cabinet, 17 Pairs handcuffs, 70 Badges, 20 Signal boxes, 1 Book rack, 15 Parade belts and billies, 3 Roll top desks, 6 Short clubs, 3 Desk chairs, 3 Iron bedsteads, 6 Office chairs, 3 Bed springs, 9 Common chairs, 3 Mattresses, 1 Couch, 6 Pairs blankets, 2 Tables, 6 Pairs sheets, 12 Spittoons, 3 Pillows, 12 Pillow cases, 1 Art square, 1 Oil cloth carpet, 24 Hand towels, 21 Window shades, 12 Dippers, 22 Window screens, 1 Water cooler, 1 Door screen, 50 Feet rubber hose, 1 Cocoa mat, Brooms, mops, etc., 3 Ink stands, 1 Accident case, 5 Ink wells, 2 Waste baskets, 1 Window brush, 3 Mirrors, 3 Shovels, 2 Books of arrests, 1 Book of complaints,

3 Dozen lanterns

1 Clock, 1 Iron safe,

1 Copy of Revised Laws.

1 Directory,

2 Account books,

STABLE.

1 Horse, 2 Blankets, 1 Harness, 50 Feet rubber hose, 1 Patrol wagon and ambulance 1 Wagon jack, combined, 1 Fork, 1 Stretcher, 1 Shovel, 1 Whip, 1 Pung, 1 Ambulance bed, Sponges, etc.

POLICE FORCE.

The Police Department, as at present constituted is composed of the following:

A Chief of Police and (20) twenty patrolmen, (1)

patrolman, as Inspector and Liquor Officer, (1) one patrolman acting as Sergeant at Police Station, during the day time, (1) one patrolman acting as Sergeant at Police Station during the night time, (1) one wagon man, (1) one driver of patrol wagon, (2) two patrolmen doing street duty in the day time, (13) thirteen patrolmen doing duty during the night time.

The number of arrests seems to increase, about on a par with the increase of population. We have had some serious out breaks of crime in the City the past year, viz:—

Constant Kroback on March 15th, for murder of Fred A. Peterson, sentenced to State Prison for life. Aug. 4th one Jim Johnson, alias Sam Scott, broke and entered the residence of Charles W. Clifford, and assaulted Clifford and George H. Heal with a knife, was sentenced to State Prison from 17 to 20 years. November 23d John Pines, alias Lewis, larceny from Patrick Dolan by threatening him with a revolver, sentenced to Concord Reformatory.

One murder case is now pending before the Superior Court at Dedham for trial.

The officers in this Department have performed their duty in a manner that should be appreciated by the citizens, and I think the work during the past year has been above the average of small cities and will compare favorably with any department in the Commonwealth.

CONCLUSION.

During the time that I have had charge of this department, it has been my purpose to faithfully and impartially enforce all laws and ordinances entrusted to this department.

To the members of the department, my thanks are tendered, for their support in the enforcement of law, also for their promptness to the calls for duty.

To Mayor Charles M. Bryant, City Clerk and City Solicitor and all other officials, to the Honorable Judge and Clerk of the District Court, I desire to acknowledge my obligations for advice and acts of kindness extended to me during the past year.

I have the honor to be

Very respectfully,

JOSEPH W. HAYDEN, Chief of Police.

Tax Collector's Report.

To His Honor the Mayor of the City of Quincy:

I have the honor to submit the following report for the Tax Collector's Department, for the year ending December 31, 1903.

Respectfully,

EDGAR G. CLEAVES,

Tax Collector.

Inspector of Animals.

To His Honor the Mayor of the City of Quincy:

I have the honor to submit the report of the Inspector of Animals for the year ending Dec. 31, 1903.

From Jan. 1 to July 15 the city was under quarantine on account of foot and mouth disease being prevalent, and no cattle, sheep or swine were allowed to be transported over our highways without written permission. During that time I made four complete inspections of all the cattle and swine in the city, and quarantined 26 head of cattle having foot and mouth disease, all of which were killed by the United States authorities.

Three cows brought here from outside the state were tested and on being found free from disease were released.

Two cases of tuberculosis in milch cows were found during the year. One was killed by the Cattle Bureau and one released for lack of funds.

Sixteen horses were quarantined, being suspected of having glanders; 14 were killed and two released.

807 cattle and 254 swine, the stables and surroundings, were inspected on the annual tour of inspection.

E. P. HENDERSON, V. S.

Inspector of Animals.

Inspector of Milk.

Hon. Charles M. Bryant, Mayor, City of Quincy:

The following report of the Inspector of Milk is respectfully submitted: —

The amount received for licenses during the current year is \$24.50. There have been no arrests by either state or local officers, as no specimens examined have been found below the legal standard.

The need of a permanent office and modern apparatus is felt by your inspector and it is hoped that an early date will bring both.

FREDERIC J. PEIRCE, M. D.

Inspector of Milk.

Jan. 1, 1904.

Sealer of Weights and Measures.

Quincy, Mass., Dec. 31, 1903.

	\$175	00

Yours respectfully,

GEORGE WESTON,

Sealer of Weights and Measures.

Board of Health.

To His Honor, the Mayor of the City of Quincy:

The Board of Health respectfully submit the following report for the year ending December 31, 1903.

February 5th, at a regular meeting the Board organized as follows:—John S. Gay, Chairman, Thomas J. Dion, M. D., Clerk.

Considerable difficulty has been experienced in the past year in carrying on the scavenger work of the city. Complaints had become so numerous that early in the year our Board felt compelled to request the Council to revoke the contract of the City Scavenger. Since, the work has been more satisfactory, although a great many complaints come to us still. We regret to say that the only remedy occurring to us (that is, the City doing this work under the Health Dept.) has been refused when the Council was asked for an appropriation to that effect. The sewer stations established in the past year, have proven a great relief and have given entire satisfaction, doing away with the dumping of vaults and cesspool matter in the open.

The collection of garbage is becoming less satisfactory every year. Several complaints have come to us this year owing to our inability to collect the swill more than twice a week in the summer months, and this from lack of men and teams.

The constantly increasing population of our city calls for more men and teams if this work is to be carried on in a satisfactory manner and we look to the Council for relief, in a larger appropriation.

The same locations have been used as "dumps" as in past years, namely, Wards 1, 5 and 6, and this Board has promptly checked any attempt to dump outside of these places. Same have also been kept free from nuisance.

The attention of this Board has been called to the condition of the brooks and ponds used as sources of ice for domestic purposes, within the city limits, and an examination of these reveals a most deplorable condition of things in some, sewage, vault and cesspool matter running openly in a water course and pond where a large part of our ice supply is yearly secured. The matter has been called to the attention of the State Board of Health and we expect, at an early date to have the public protected against further exposure to the danger of sewage pollution of ice.

There has been a marked decrease in the number of infectious diseases reported to our Board this year over last, as shown by the following tables, indicating a total of 241 against 458 in 1902. Also a decrease in all diseases but scarlet fever where a slight increase is to be noted.

The most important check to the spread of contagion in diseases among children lays in the strict enforcement of the rules of quarantine, and the school is the most common ground of contagion. Our Board, therefore, depends to a great extent upon the cooperation of both parents and school authorities for a proper enforcement of these rules and regulations existing for the benefit of all.

It is also to be noted that a marked decrease in deaths has has taken place, 352 deaths the past year as against 399 in 1902 with an estimated population of 26,042 this year as against 25,307 the previous year making the death rate in our city 13.51 per thousand, a remarkably low one.

The following licenses have been issued by this Board in 1903:

Plumbers .	•	•	•	•	•	•	42

SANITARY INSPECTOR.

Quincy, Mass., Dec. 31st, 1903.

To the Board of Health:

Gentlemen:—I respectfully submit the following report for the year 1903.

Number of complaints received					189
Unclean cesspools					79
Privy vaults		•	•		45
Sewage flowing into water cours	ses .		•	•	21
Sewage flowing into streets .	•		•	•	19
Keeping swine	•		0		7
Poultry in cellars			•		3
Unclean cellars	•			•	7
Manure piles	•		•		2
No cesspools on premises .					6
Houses fumigated for contagious	s diseas	ses			91
Tuberculosis					4
One pest house (smallpox.)					
Premises examined	•		•	•	380
Ordered to connect with the sew	er.		•		29

I find in looking over my order book for 1903 for the cleaning of cesspools and vaults, I gave the city scavenger, Mr. Peter McConarty, five hundred and one (501) orders to clean premises together with one hundred and twenty-four (124) complaints of nuisance. He has only returned three hundred and sixty notices of places cleaned. As the records of the office did not begin until May 28th, 1903 there is no record of the orders we received previous to that date, of which he received a great many. Mr. McConarty's returns show that he carted three hundred and ninety-seven loads from cesspools. He has returned fifty-one cesspools cleaned without the amount taken from them.

Double vaults cleaned		0		•	•	•	73
Single vaults cleaned		•			•		155
Factory	•				•	•	1
Stone shed	•	•	•		•		1

Total number of loads of cesspool matter remov	red	
by C. L. Prescott and McConarty, 1903.		844
Double vaults cleaned by the above		103
Single vaults cleaned by the above		181
By comparing the returns of C. L. Prescott, '0)2:	
Loads from cesspools	•	1,195
Double vaults cleaned		378
Single vaults cleaned		458
C. L. Prescott from Jan. 1 to Apr., 1903:		
Loads from cesspools		396
Double vaults cleaned		30
Single vaults cleaned		26
By McConarty from April, 1903:		
Loads from cesspools	•	448
Double vaults cleaned		73
Single vaults cleaned		155
By Prescott and McConarty, 1903:		
Loads from cesspool	•	844
Double vaults cleaned		103
Single vaults		181
Factory		1
Stone shed		1

There were 351 more loads of cesspool sewage removed by Prescott in 1902 than McConarty in 1903. There were 275 more double vaults cleaned by Prescott in 1902 than McConarty in 1903, and 277 more single vaults cleaned by Prescott in 1902 than by McConarty in 1903.

It is my opinion that there were as many premises cleaned this year as in 1902, but the returns from the city scavenger, McConarty, were very unsatisfactory and do not show it.

Yours truly,

EDWARD J. LENNON,

Sanitary Inspector.

ANTITOXIN DISPENSED.

Mr. John S Gay, Chairman of the Board of Health:

DEAR SIR:—I beg leave to report to you that during the year from January 1st, 1903 to January 1st, 1904 I have dispensed on physician's requisitions 288 bottles Antitoxin and 50 culture tubes.

Respectfully submitted,

CHARLES C. HEARN.

INSPECTOR OF MEATS AND PROVISIONS.

To the Board of Health of the City of Quincy:

GENTLEMEN: - I herewith render you my report for the year ending December 31, 1903.

Number of ins	spections		٠	,		•	593
Number of lic	enses grant	ed	•	•	•	•	67

FREDERICK E. GOSS,

Inspector of Meats and Provisions.

EXAMINERS OF PLUMBERS.

To the Board of Health of the City of Quincy:

Gentlemen:—The Board of Examiners of Plumbers beg leave to make the following report:—

Two examinations were held by the Board during the year. There were six applicants for examination, three for journeymen's and three for a master's license. All passed examinations successfully and were granted licenses.

Respectfully submitted,

WILLIAM A. BRADFORD,

Sec. Board of Examiners.

INSPECTOR OF PLUMBING.

To the Board of Health of the City of Quincy:

Gentlemen:—I hereby tender my tenth annual report as Inspector of Plumbing for the year ending Dec. 31, 1903. During the year the following matters have been attended to:

Dwelling	houses	sinsp	ected	l	•	•	•	•	406
Offices	•	•	•	•	•	•	•	•	5
Fire Stati	ons	•	•	•	•	•		•	1
Barber Sh	ops	•	•	•	•	•	•		3
Restaurai	nts	•	•	•	•	•	•	•	4
Business	Blocks	}	•	•	•			•	1
School Ho	ouses	•			•	•	•	•	2
Hospitals		•			•	•	•	•	2
Laundries		•	•		•	•	•		1
Stores	•		•	•	•				14
Stables		•		•	•		•	•	1
Beach Cot	tages.	•	•	•		•		•	28
Factories	•	•		•	•	•	•	•	4
Connected	with	cessp	ool	•					169
Connected	with	sewe	r		•	•	•	•	279
Old buildi	ngs co	nnect	ed w	ith se	ewer	•	•	•	206
New build	lings c	onne	eted v	vith s	sewei		•	•	73
Number o	f perm	its is	sued	1903	•	•	•		473
Number o	f perm	its is	sued	1902	•	•	•	•	428
Increase of	over 19	902	•		•	•	•		45
Λ ggregate	estim	ated	value	of w	ork (lone	•	\$63	,000
Aggregate	estim	ated:	value	of w	ork d	one i	n 190	2 50	,000
Increase c	ver 19	02	٠	•	•		•	. 13	,000

Convinced by reflection that the advent of the public sewer is a blessing rather than an incumbrance, the public in general is becoming more kindly disposed toward connection with the same and the cesspools are disappearing faster and faster with each year.

Respectfully,

J. J. KENILEY,

Inspector of Plumbing.

Report of City Engineer.

To His Honor the Mayor:

I herewith submit the fourth annual report of this department for the year ending Dec. 31st, 1903.

The usual appropriation of \$2,500 was made together with an appropriation made July 20th of \$1000 to continue the system of Assessors' plans.

The regular appropriation has been used as follows:

Appropriation		\$2,500	00
Pay roll	\$2,164 08		
Office supplies and instruments	287 43		
Postage, expressage and transportation	38 35		
		2,489	86
Balance		\$10	14
Assessors' appropriation, balance July			
1903	,	7	18
Assessors' appropriation, July, 1903.		1,000	00
		\$1007	18
Pay rolls and supplies		406	84
Balance Jan. 1st, 1904		\$600	34

The following streets or portions of streets have been accepted and laid out as ways of the city. Grades have been given for construction and monuments set at the principal boundary points.

Name		Fro	m			То		Length	Width
Federal ave.	God	dard	street	Ind	lepen	denc	e ave	1396 ft.	40 ft
Penn street	Penr	stre	eet	645	ft. s	outh	erly	645 ft.	40 ft
Total .		•		٠	•	•		2041 ft.	

COMMITTEES OF THE COUNCIL.

The following plans were made for the chairmen of committees and different members of the City Council:

Frontages on Water street from Quincy street to Brewers corner for sidewalk.

Plan and profile of drain on School street from Phipps street to Quincy avenue.

Plan, profile and estimate of Sea avenue from Sea street to Island avenue.

Plan and profile for extension of Penn street.

Topographical plan for Trustees of the Thomas Crane Public Library.

Plan and profile of Washington street from Hancock street to Chubbuck street for widening.

Plan and profile of Webster street for acceptance.

Plan and profile of Freeman street for acceptance.

Plan of Hancock street from Granite street to Cottage avenue for widening.

DEPARTMENT OF PUBLIC WORKS.

The following field work has been done for this department. Lines and grades for construction on Edison street, Newbury avenue extension, Adams street, Rock Island road, Hamilton street, Independence avenue and Federal avenue.

Location and grades given for drain on Chubbuck street, also drain on Squantum and Webster streets.

WATER DEPARTMENT.

Locations have been given for 2756 feet of water pipe from Franklin avenue through the Metropolitan Park Reservation to Rufes Hummock in Ward 5. Also, 1000 feet on Grove street and Forest avenue in Ward 4.

MANAGERS OF PUBLIC BURIAL PLACES.

In January 1903 the City Council passed an order for a survey and plan of the Hancock Cemetery. No appropriation accompanied the order and the cost was charged to the regular appropriation for engineering. The work has been carried on at

different intervals during the year when the regular work of the office would permit. The field work has been completed and plotted at a scale of ten feet to an inch making a plan 57 inches by 53 inches. All the stones and tombs have been located and names with age and date of birth and death noted. Every tomb and single grave has been assigned a number on the plan and an index is now in progress which will give the names alphabetically and also numerically. This plan when complete will be on file in the City Clerk's office for reference.

Lines and grades have been given for new lots and drives in Mt. Wollaston Cemetery.

POLICE DEPARTMENT.

A large plan was made for the "Krobeck" murder case for the district attorney and evidence given at the trial.

HOUSE NUMBERING.

There were 143 house numbering plans completed Jan. 1st, 1903. During the present year 44 plans have been made and numbers assigned to 900 houses.

ASSESSORS' PLANS.

This work has been carried on continually since the first appropriation was made in 1901. Wards one and two are completed and Ward three is about three-quarters completed, also a small portion of Ward five

Every year these plans must be revised to correspond with all recent transfers and all the new houses and buildings located. There are completed to date 261 plans representing Wards one, two and three.

Respectfully submitted,

HAMILTON FLOOD,

City Engineer.

Board of Park Commissioners.

Hon. C. M. Bryant, Mayor of Quincy, Quincy, Mass .:

Dear Sir:--The Board of Park Commissioners of the City of Quincy herewith submits its report for the year 1903.

MERRYMOUNT PARK.

As the sum allowed this Board to maintain all the Park and Playgrounds is insufficient to do any large work, this Board has followed the practice of former years in Merrymount Park, and endeavored mainly to keep the trees and grounds in good order.

As last year, one regular man has been employed throughout the spring and summer on this work at Merrymount Park, Faxon Park and the playgrounds. Only a few trees have been planted. At the rate the old ones are dropping off, annual systematic tree planting on a considerable scale should be undertaken. It will require a larger appropriation than in the past if this is to be done properly.

While the dead wood has been cleared away as soon as possible, some persons thought best last winter to assist without permission. As a result, one offender was caught and fined in court for the offence.

The ball fields and woods have been in almost constant use, for games or picnics. The fields adjoining Blacks creek was so badly flooded with salt water leaking through the dam, as to reduce its rentable value for a cow pasture, one-half. The leaky dam also precluded the flooding of the meadow with fresh water, for skating, in the winter of 1902 and 1903.

When this was called to their attention, the Metropolitan Park Commissioners, who owned to the middle of Blacks creek, agreed to pay one-half the cost of repairs on the dam.

These repairs were made in a satisfactory manner before cold weather, by the Commissioner of Public Works. As a result the meadow was flooded with fresh water, and good skating was enjoyed by great numbers during the cold weather in December.

The Metropolitan Sewerage Commissioners desire to put a force-main from the pumping station across the Park, to Green-leaf street. This Board has asked for compensation in lieu of any damages in the future. The matter is now under consideration.

WARD TWO,

Little has been required here, other than to keep the ball field moved and rolled. Tree planting should be undertaken, if the beauty of the bluff, jutting into Town river is to be preserved.

One of the trunk lines of the Quincy sewer system was run through the grounds the past season. Some of the sand taken out was spread on the beach to low water mark, with the result that the beach is now almost perfect for bathers.

BATH HOUSE.

This resort has been as popular as ever. The great crowds attending on warm days, especially Saturdays and holidays, give constant evidence of the need of increased accommodations. A considerable part of the appropriation for use of this department is expended in maintaining the bath house.

WARD THREE.

While the work on this playground in 1902 left little to be done, yet some grading and draining was required to complete the playing field. The condition of the field today is a marked contrast to the swampy ground before the improvements were begun in 1901 and 1902.

The young trees, each with a guard, so planted as to interfere as little as possible with ball games, have not done well. This is mainly owing to unscientific pruning, as practiced by the youth of the neighborhood. So far, it has been impossible to detect these vandals. This Board asks the co-operation of the executive and police departments in its efforts to detect and punish offenders here and at other places mentioned herein.

WARD FOUR.

Practically no work has been done here beyond mowing and rolling the field. Negotiations are now on foot for a re-arrangement of the bounds of that part of the playground toward Reardon street.

The area will not be materially changed, and the playground will then have its southern boundary on Reardon street for a considerable distance.

WARD SIX.

The unsightly appearance and uneven surface of the ground which has so long existed here, caused your Board this year to take measures to make a long contemplated improvement. At an expense of over \$1,200 paid for by a special appropriation from the unexpended balance of the playground fund, the whole ground has been covered with soil, seeded, and walks laid.

The greatly improved appearance of this conspicuously situated playground would seem to justify the action of your Board.

FAXON PARK.

Again we have to report little change for this beautiful spot. The paths have been kept cleared as well as possible, but nature has done the rest; all except what is done by vandals, who from time to time cut down trees of many years' growth. We regret to say that none have yet been caught in the act.

The new road, connecting Quincy avenue and Independence avenue and bordering on the park for more than half its length, will do much to bring the park into more general use.

Signs have been placed at both ends of this new street, and at both ends of the park, so that no one can longer be in doubt as to the location and bounds of the park.

Roughly the funds at the disposal of this Board, and their disposition, have been as follows:

General appropriati	on			•	\$1,200	00		
Receipts from pas	ture,	Merry	ymo	unt				
Park	•		•	•	50	00

BATH HOUSE ATTENDANCE FOR 1903.

Opened May 30th, closed September 16th, though men's department used some up to September 26th. June attendance small on account of cold wet weather.

Men's department:

	Season May 30 to Sept. 26.	•			12,169
	Largest week, July 6 to 12			3,340	
	Largest day, July 9	•	•	700	
Wo	men's department:				
	Season May 30 to Sept. 16, (few	in .	June)		7,404
	Largest week, July 8 to 14		•	1,554	
	Largest day, Aug. 12		•	432	
	Total both departments, season				19,573
	Exceeding 1902 by 3,161.				,

Respectfully yours,

GEO. E. PFAFFMANN.
FRED B. RICE, Secretary,
L. W. GLOVER, Chairman,

Fire Department.

To His Honor the Mayor of the City of Quincy:

In compliance with the requirements of the City Ordinance, I hereby present my ninth annual report for the year ending December 31, 1903, containing a statement of all fires and alarms for the year, the loss and insurance on the same as far as could be ascertained, the list of the permanent force of the Department and their-ages, also a schedule of the property under their charge.

ORGANIZATION.

The force consists of one Chief and three assistant engineers' fifteen permanent and sixty-four call men; Combination No. 1 at Central Fire Station has two permanent men and eight call men, Combination Hook & Ladder No. 1 has one permanent man and eight call men, Combination Hook & Ladder No. 2 has two permanent and seven call men, Hose 2 has one permanent and five call men, Hook & Ladder No. 3 has one permanent man and seven call men, Hose 3 has one permanent and six call men, Hose 4 has one permanent and six call men, Hose 5 has ten call men, Combination No. 2 has two permanent men and seven call men, Hose 1 has one permanent and one call man.

OFFICERS.

Chief Engineer, P. J. Williams. First Assistant Engineer, J. H. O'Brien. Second Assistant Engineer, F. C. Packard. Third Assistant Engineer, D. J. Nyhan.

APPARATUS.

The apparatus of the Department consists of one steam fire engine in fair condition, two combination chemical engines and hose wagons, two combination hook and ladder trucks, and one straight hook and ladder trucks, five hose wagons, one hose reel, two express wagons for fire alarm purposes, also one chemical engine and one hand engine not in service.

HOSE.

We have in the service 10,500 feet of cotton hose, rubber lined; 6,000 feet is in good condition, 3,000 feet in fair condition, 1,500 feet in poor condition. I believe the Department should be kept well supplied with hose in case of emergency. The life of hose is two years, after that it is liable to burst when heavy pressure is put on. I will call the attention of the Council to placing more hydrants on old line of pipes as it will give better fire protection, also saving the city a great deal of money in using shorter lines of hose.

FIRE ALARM.

The fire alarm service has been increased the past year by adding new boxes. Several miles of wire has been rebuilt. We have as near as can be ascertained one hundred and ten miles of wire to keep in order. This branch of the service needs the greatest attention so when boxes are pulled they will work promptly.

ELECTRICAL APPLIANCES.

There are two hundred and thirty cells of battery, one six circuit repeater, one six circuit switchboard with switches, seven galvanometers, six lightning arresters, one quartered oak switchboard and seven switches, one circuit breaker, one volt-meter, one millampmeter with six switches, six resistance coils, six jacks with plug, five Rogers protectors, twelve lamps with 104 volts each, hydrometer with test tube in box, one eighteen inch combination gong and indicator at Central Fire Station. Chief Williams has two gongs, one 6-inch, and one_12-inch, both Gamewell gongs; Old Colony Street R. R. at Power House has one 12-inch gong, Gamewell; Tubular Rivet and Stud Co., one 2-inch Gamewell; Engineer F. C. Packard, one 18-inch Gamewell and one 6-inch tapper; Engineer J. H. O'Brien, one six-inch Stevens; Reporter George T. Magee, one 6-inch Stevens; Capt. Taylor, one six-inch Gamewell; William Marden, one 6-inch Gamewell; Hose 4, one 6-inch Gamewell; Hose 3, one 12-inch Gamewell; Engineer D. J. Nyhan, one 6-inch tapper.

Stored at the Central Fire Station; 2 direct acting tappers, one 15-inch Stevens and one Gamewell 6-inch. One horse, wagon, harness, whip and blankets, one strap and vice, one pair of

spurs and plyers. Number of boxes 76. Four tower strikers on churches and two automatic whistles.

HORSES.

The number of horses in the Fire Department are 20 which are all in good condition and in good working order. Their ages run from 8 years to 24 years.

RECOMMENDATION.

I would recommend fitting up Houghs Neck fire station with two permanent men and ten call men. I would also recommend putting in a ladder truck and hose wagon; also recommend three more permanent men, one to be assistant to Supt. of Fire Alarm and Police Alarm, as one man cannot take care of fire and police alarm properly.

CONCLUSION.

In closing this report, I desire to tender my sincere thanks to his Honor, Mayor Bryant, for his interest in the welfare of the Department, to the Council for all favors rendered during the year, to the City Auditor and Treasurer for all favors rendered, to the Chief of Police and Officers for the manner in which they performed their duties at fires, to my associates of the Board of Engineers, and to the officers and members for the prompt and efficient manner in which they discharged their duties thereby maintaining the reputation of the Department for efficiency. Also I want to thank Supt. of Fire Alarm, William H. Gavin, for his promptness and good service for taking care of fire alarm and police alarm.

PERMANENT MEN.

Charles P. Costa, age 57,
Thomas Hogan, age 40,
James Cornell, age 34,
John Faircloth, age 45.
Faxon Billings, age 37,
J. Lyons, age 49,
A. Mead, age 43,

- Dec. 31. Box 136, 8.12 p. m. Water street. False alarm.

Board of Sewerage Commissioners.

Quincy, Mass., Jan. 1, 1904.

To His Honor the Mayor and the City Council of the City of Quincy:

Gentlemen—Most of the work of sewer construction during the past year has been carried on in Ward Two. The Board has received petitions for sewers in other wards far in excess of the appropriation available. These petitions have been carefully considered and sewers have been built only in what seemed the most urgent cases.

When the appropriation for sewer construction became available we advertised for proposals for building two sections of the Quincy Point main, Section 11, from Canal street near Newcomb street to Edison street, and Section 12, from a point in land of the Hanley Construction Company to Washington street and in Washington street from Broadway to a point four hundred feet (400) southeasterly from South street. In the autumn of 1902 proposals were advertised for and received for building Section 11, and were rejected because the Board thought them too high. The prices this year were nearly ten per cent. lower than those bid in 1902. Both of these contracts were awarded to T. J. O'Connell of Dorchester at the following prices:

		SEC	TION	11.	SEC	CION	12.
Earth excavation 0 to	8 ft	\$.70	per	cu. yd	. \$.75	per	cu. yd
Earth excavation 8 to	14 ft	1.00	66	44	1.10	66	"
Earth excavation 14 to	20 ft	1.50	"	"	1.50	"	"
Earth excavation below	20 ft	2.00	"	44	2.00	"	"
Rock excavation 0 to	8 ft	4.50	"	"	4.50	"	"
Rock excavation 8 to	14 ft	-6.00	"	44	6.00	"	"
Rock excavation below	14 ft	8.00	66	44	8.00	"	"
Earth excavation in tur	nnel	11.00	per	linear	foot.		
Rock excavation in tun	nel	19.00	per	linear	foot.		

Brick masonry,	\$5.25 per cu. yd.	\$5.25 per cu. yd.
Concrete masonry,	4.00 per cu. yd.	4.00 per cu. yd.
Laying 8 and 10 in. sewer	r	
pipe,		.15 per lin. ft.
Laying 15 in. sewer pipe,		.20 per lin. ft.
Laying 18 and 20 in. sewer	ı,	
pipe,	.30 per lin. ft.	.30 per lin. ft.
Laying underdrain,	.30 per lin. ft.	.30 per lin. ft.
Laying chimneys,	.15 per lin. ft.	.15 per lin. ft.

The sewers built under contract were completed in November. The part of the main sewer not included in the contracts was built by the city by day labor, the work having been begun in 1902 and completed in 1903.

With the appropriation available for lateral sewers in Ward Two, sewers have been built in those streets that seemed in the most urgent need of sewerage. We now have 40.016 miles of sewers, of which 4.086 miles were built in 1903, as shown by the following list.

Wollaston ave.,	8	745.3	Hancock st.	Fenno st.

The cost of labor pay rolls, lumber tools and lighting on the work done by the city, including the part of the main sewer to Quincy Point done in 1902, was \$22,605.87. If this work had been done by contract at the same unit prices as were paid under the contracts for Sections 11 and 12, the cost would have been \$25,706.73, an increase of about 13 7-10 per cent.

The screen chamber on Quincy street for the discharge of cesspool and vault matter into the sewer was completed and put into operation early in the year. The one on Penn street was completed in 1902. These screen chambers do the work for which they were designed, retaining the heavy solids and allowing the liquids and lighter solids, which can be carried in suspension, to pass into the sewer. This method of disposal seems to be entirely satisfactory for the contents of cesspools and vaults which are properly used. Some vaults however, are found to contain a large percentage of ashes, cans and miscellaneous articles which should be disposed of in some other way. When taken from a vault and deposited in the screen chamber the ashes, cans, etc., are retained and have to be removed to some dump at considerable expense. Some measures should be taken to prevent the deposit of heavy and insoluble solids in vaults and if this is found to be impracticable we would advise that a

dump be provided where the vault matter in solid form containing a large percentage of ashes and heavy solids can be covered with earth, while the contents of cesspools and well kept vaults can be disposed of through the screen chambers with entirely satisfactory results.

The expenditures from the appropriation for sewer construction have been as follows:

Pay rolls			\$26,719	46
T. J. O'Connell, Contractor, Section 11, Sect			22,178	80
George E. Thomas, building over Scavenger	's ta	nk	563	00
Stock and tools			23,182	44
Rights of way, land and other damages .	•	•	2,110	38
Advertising and printing	•		151	85
Office expenses, including telephone, stat	ione	ery,		
office supplies and carfares	•	•	188	14
Rent of 1902	•		75	00
Total	•	•	\$75,169	07
Balance of 1902 appropriation . \$11,	321	10		
1903 appropriation 7.0,	000	00		
Unexpended balance	•	•	6,152	03

HOUSE CONNECTIONS.

During the year 265 connections have been made with the public sewers, aggregating 12,203.5 feet in length. The cost has ranged from 25 cents to \$1.57 per foot, the difference being caused by various local conditions. The average cost for the year has been \$.547 per foot or \$25.18 per connection.

The cost of this work \$6,672.75 has been assessed upon the estates connected and has been committed to the Collector of Taxes for collection. At the beginning of the year there was an unexpended balance of \$1,093.54 from the appropriation for house connections. During this year an appropriation of \$6000 was made and pay rolls and bills to the amount of \$6,501.48 have been approved leaving an unexpended balance of \$592.06.

ASSESSMENTS.

On March 4, 1903, 737 notices of sewer assessments were sent out on account of sewers built in 1902. These assessments amounted to a total of \$37,466.66. Upon request of the property

owners 375 of these assessments aggregating \$20,040.03 were apportioned, most of them into ten parts. Work is in progress on the assessment plans for work done in 1903 and we expect to be ready to send out the assessment notices in January.

The claim of John Sheehan on account of bill for extra work on Main sewer built in 1897-8 is still pending in Court.

As noted above we have on file a number of petitions for sewer extensions in various parts of the City. We have not been able to build sewers asked for in these petitions on account of lack of appropriations. The districts which would be served by the building of these sewers are in need of sewerage.

Respectfully submitted,

A. F. SCHENKELBERGER, WILLIAM T. ISAAC, THOMAS J. LAMB,

Board of Sewerage Commissioners.

Board of Assessors.

To His Honor the Mayor of the City of Quincy:

The Board of Assessors herewith submit their annual report for the year 1903:

Warrants received and amount raised for current expense by the assessment of taxes in the City of Quincy for the financial year commencing January 1, 1903, by the Board of Assessors, were as follows:

., .	20 000 20020 1120	
A	State warrant for the proportion of the City of Quincy, of a State tax of \$2,500,000.00	\$16,925 00
A	County warrant for the proportion of the City of Quincy, of a County tax of \$158,-	
	500.00	15,333 60
Ву	the provisions of chapter 488 of the Acts of the year 1895, entitled "An Act to provide for a Metropolitan Water Supply," we have	
	been assessed for the year 1903	30,237 42

"	"	1903, 50,180 square feet .			1,700 00
Metrop	olita	in sewer, 11,863,337 square fee	t.	•	99,525,00

The Assistant Assessors who served during the year were:

Henry P. Kittredge	•	•	•	•	Ward	1
Albert Keating .	•	•	•	•	"	2
William J. Parker	•	•	•	•	"	3
William H. Teasdale		•	•	•	"	4
Charles R. Sherman,	•	•	•	•	"	5
T. L. D. Gurney	•	•	•	•	•	6

The polls returned for the year were 8,201; a gain of 647 over the year 1902. Were made up as follows:

	Precinct 1.	Precinct 2.	Total.
Ward 1,	684	763	1,447
Ward 2,	671	666	1,337
Ward 3,	750	913	1,663
Ward 4,	713	935	1,648
Ward 5,			1,179
Ward 6,	488	439	927

During the past year there has been returned to this office by the Sewer Commissioners 378 main sewer apportionment assessments, and 265 particular sewer assessments; and by the City Council two apportioned sidewalk assessments. With these additions the whole number of individual accounts now kept in this office are, viz:

Main sewer assessments	•	•		•	1,437
Particular sewer assessments,			•		335
Sidewalk assessments .		•			31

Each one being divided into from three to ten parts; one part, with the interest on the unpaid balance, being added annually to the tax bill of each person affected by these assessments.

During the year the Board had the second instalment of Assessors' plans covering Ward 1 prepared in the office of the City Engineer. This now gives the Board plans for two wards, namely, 1 and 2; and it is anticipated that the appropriation of \$1,000 made last year to continue the work will furnish plans of Ward 3 and a portion of Ward 5.

The views of the Board (as expressed in their report of last year) are unchanged regarding the benefits the city derives from a complete survey, not only in the assessment of taxes, but as a reference and record, and recommend that the ensuing year a further appropriation of \$1,000 be made to continue the work.

In closing, we wish to thank our assistants and his Honor the Mayor for their support and co-operation in furthering the work of the Board.

JAMES THOMPSON, CHARLES H. JOHNSON, Of the WILLIAM B. GLOVER, City of Quincy.

Report of City Solicitor.

FEBRUARY 1, 1904.

To His Honor the Mayor of the City of Quincy:-

Concerning the business of my office of City Solicitor for the year 1903, I beg leave to submit to you the following facts:

The cases against the City referred to in my last report and since disposed of are as follows:

E. H. Doble	vs.	City of	Quincy.
Faircloth	vs.	čć.	"
Bates and Jenness	vs.	66	46
Joslin	vs.	66	"
Merrill	vs.	44	66

The case of Walter Dole vs. City of Quincy brought in 1903, has also been disposed of.

The suits brought in 1903 and still pending are:

First Congregational Society				
of Quincy	vs.	City of	Quincy	•
Florence Locke	VS.	"	"	
Paul H. McIntire	vs.	66	"	
Willard S. Ford	vs.	"	۲۲	/
James P. King	VS.	"	66	
Zaccaria Farella	vs.	"	46	
William Hanrahan	vs.	"	46	
Eric G. Bergford	vs.	66	"	
Alfred H. Hook	vs.	"	66	
Patrick Cain	vs.	66	"	
William H. Willett	VS.	"	"	
Joseph Silva	vs.	"	"	

There is also a petition of Thomas Blanchard et als. vs. County of Norfolk et als. in which the City of Quincy is interested. This is a petition for the appointment of a special commission to apportion the cost of building the Quincy Point bridge upon such cities, towns and quasi-public corporations as are specially benefited thereby.

On behalf of the City I have, during the past year, brought two suits, one against the town of Weymouth and the other against the town of Dedham, to recover sums of money paid by the City of Quincy for the benefit of persons having a legal settlement in said towns. The case against Dedham has been settled in favor of the City of Quincy. The case against Weymouth, which was tried before Judge Harris, is now held by him under advisement.

I have had the usual number of claims to investigate for accidents caused by alleged defects in highways and claims for damages to property by reason of changes in grade in several of the streets of the City.

At your request I drew a bill which was introduced at the present session of the Legislature to require the Commonwealth of Massachusetts to take and maintain Randolph avenue as a part of the Metropolitan Park District and also a bill to require the Commonwealth of Massachusetts to take and maintain the new bridge across the Weymouth Fore river. Both matters are now in the hands of committees of the Legislature.

The two bills drawn by the Solicitor asking for an appropriation for the construction of the Quincy Shore Reservation and the Furnace Brook Parkway and introduced into the Legislature of last year were reported favorably by the committee and the appropriation was made by the Legislature and placed in the hands of the Metropolitan Park Commission for the construction of the boulevard and parkway. The passage of these bills was sometime subsequent to the Solicitor's last report.

The matter concerning the widening of the bridge over the railroad at Hancock street near Atlantic is now in the hands of a special commission of which Judge Dunbar is chairman and without doubt the bridge will be constructed this spring.

During the year I have had an office for the transaction of city business at City Hall and have daily given a part of my time to the heads of the departments who have had need of my advice or services.

Very respectfully yours,

PAUL R. BLACKMUR,

City Solicitor.

Adams Academy.

Hon. Charles M. Bryant, Mayor:

DEAR SIR:—The Managers of Adams Academy respectfully transmit the report of the Master for the year 1903.

LUTHER S. ANDERSON,
JOHN A. BERNHARD,
GEORGE B. DEWSON,
WILLIAM EVERETT,
WALTER S. PINKHAM,
JOSEPH M. SHEAHAN,

Board of Managers.

The Master of Adams Academy has the honor to submit to his colleagues of the Board of Managers, his report for 1902–1903. The school year has been one of quiet prosperity. At the annual prize declamation a new feature was introduced of awarding diplomas to seventeen boys who had completed the course of study. These diplomas, which appeared to give great pleasure were provided by the generosity of Mr. F. B. Rice of the Board of Supervisors, who kindly presented them to the boys.

The candidates for admission to Harvard College entered with distinctly higher credit than in some recent years. The Tyler and Dimmock scholarships were assigned to Frederick Ernest Moir and Ray Faunce Weston. It is greatly to be regretted that the expense of a college course still prevents many very meritorious alumni of the Academy from carrying their studies further.

It is an interesting circumstance that five of our former members are this year in the General Court of Massachusetts, including two recipients of the Adams Gold Medal. One of these, a descendant of an honored pastor of the First Parish, is now Speaker of the House of Representatives.

WILLIAM EVERETT,

Master.

Quincy, 18 January, 1904.

Report of the City Clerk.

To His Honor the Mayor of the City of Quincy:

I herewith submit the fifteenth annual report of this office, for the year ending December 31, 1903.

RECEIPTS.

Marriage licenses .		•	•	\$140	00	
Dog license fees .	•		•	230	80	
Other licenses and fees	•	•	•	362	25	
Recording mortgages	•		•	81	75	
Total	•					\$814 80

The above sum has been paid to the City Treasurer.

Number of Marriages recorded in 1903		•	287
Number of Marriage intentions recorded in 1903	•		280
Number of Births recorded in 1903	•		811
Number of Deaths recorded in 1903			407

The number of dogs licensed during 1903 was 1012 males, 132 females, 2 kennels, for which the sum of \$2,734 was received, of which \$2,503.20 was paid to the County Treasurer, the remainder being included in the above account of receipts as dog license fees.

Annexed are lists of births, marriages and deaths recorded in Quincy in 1903, the election returns for 1903, and the jury list for 1904.

Yours respectfully,

HARRISON A. KEITH,

City Clerk.

Jury List for 1904.

Prepared by the Registrars of Voters; posted for ten days and then accepted by the City Council.

Avery, John A., 8 River st., foreman.

Adams, Herbert D., 767 Washington st., clerk.

Addison, Leonard F., 5 Old Colony ave., machinist.

Ames, Samuel E., 58 Cross st., grocer.

Ahern, John J., Newbury ave., book-stamper.

Andrews, Walter H., 441 Washington st., spar maker.

Burke, Robert G., 289 Newport ave., laborer.

Beattie, Robert, 179 Willard st., granite cutter.

Black, Alexander T., 59 Payne st., granite cutter.

Baker, George S., 270 Safford st., clerk.

Bryant, George V., Madison st., builder.

Bowman, George C., 115 Intervale st., stonecutter.

Brewer, Frank, 2 Bigelow st., grocer.

Brown, George H., 29 Garfield st., engineer.

Barry, William B., 58 Crescent st., stonecutter.

Burkhard, Aloys, 10 Wittich pl., shipper.

Bennett, Edwin S., 27 Granite st., carriages.

Branch, Ernest W., 72 Putnam st., civil engineer.

Bean, Joseph E., 104 Washington st., machine operator.

Boyden, Fred S., 644 Hancock st., builder.

Barlow, Elisha J., Norfolk st., carpenter.

Bigelow, John P., 95 Franklin st., clerk.

Burns, Michael, 20 Payne st., granite dealer.

Buckley, Phineas, Flint st., iron moulder.

Barstow, Alfred T., 154 Beach st., machinist.

Burns, John Edward, 50 Payne st., shoemaker.

Ballou, John C., 6 Rogers st., granite.

Bent, John H., 11 Cottage ave., salesman.

Barnes, James M., 25 Saville st., foreman.

Beal, Arthur C., Vane st., printer.

Bestgen, John G., 1 Vershire st., cutlery.

Bisson, Thomas J., Federal ave., granite cutter. Branscheid, Peter W., 19 Botolph st., variety store. Brasee, Watson H., 103 Grand View ave., merchant. Burch, Ernest D., 61 Squantum st., agent. Burke, John W., 82 Common st., granite cutter. Carlson, Charles F., 40 Saville ave., variety store. Chase, William P., 75 Beach st., gold beater. Coolidge, Waldo A., 39 Quincy ave., carriage painter. Casey, James P., 30 Brook st., machinist. Carter, Benjamin W., 25 Granite st., gardener. Chase, Richard D., 9 Goffe st., bookkeeper. Connelly, Dennis, 15 Cottage ave., teamster. Coyle, Luke J., 47 Brackett st., blacksmith. Crane, Frank W., 92 Revere road, grain dealer. Conway, Patrick E., 13 Cross st., blacksmith. Curry, Michael, 47 Bates ave., stonecutter. Crowell, Fred S., 42 Crescent st., stonecutter. Coleman, Patrick, 106 Federal ave., stonecutter. Chase, William L., 1585 Hancock st., baker. Carey, Charles P., 327 Newport ave., gardener. Coombs, Fred H., 280 Farrington st., carpenter. Curtis, Thomas, 265 Franklin st. Canty, John, Hodges ave., machinist. Clark, Joseph P., 68 Squantum st., clerk. Costa, Joseph S., 45 Pearl st., granite cutter. Carey, Timothy J., 176 South st., insurance. Cunningham, John E., 33 Squantum st., plater. Chissell, Dennis J., 35 Glover ave., machinist. Campbell, Murdock A., 150 Granite st., blacksmith. Cantley, Thomas C., 7 Prospect Hill st., stonecutter. Crammond, David, 9 Intervale st., stonecutter. Dunn, Edward J., 118 Whitwell st., conductor. Damon, Amos E., 39 Edwards st., stove dealer. Drake, George W., 478 Washington st., poultry dealer. Drew, Cephas, 9 Walker st., clerk. Donovan, Jeremiah W., Squantum st., real estate. Drake, Thomas F., 170 Washington st., real estate. Dunphy, Thomas J., 39 Chestnut st., bookkeeper. Drummond, David T., 4 Jackson st., tool maker.

Dugan, John J., 80 Common st., insurance agent. Desmond, James F., 105 Copeland st., granite. Devine, William, 4 Center st., stonecutter. Dillon, James P., 3 Conant st., blacksmith. Drohan, Edward F., 7 Conant st., stonecutter. Dunn, Columbus, 1 Dunn's hill, blacksmith. Dunbar, Walter H., 46 Gay st., compositor. Devine, Jerome, 4 Centre st., stonecutter. Duggan, John, 2d, 2 Bryant ave., quarryman. Dolliver, Albert G., Upland road, clerk. Elcock, James C., 18 Furnace ave., granite cutter. Edwards, Stephen H., jr., 20 Walker st., tinsmith. Edgerton, David R., 249 S. Central ave., carpenter. Egan, Philip T., 2 Cross st., salesman. Ewell, William W., 7 Foster st., bookkeeper. Ela, Levi C., 197 Farrington st., carpenter. Estabrook, Henry L., Fenno st., farmer. Elcock, George F., 162 Copeland st., granite dealer. Farquhar, George, 19 Centre st., polisher. Fletcher, James B., 33 Garfield st., stonecutter. Fay, Patrick, 19 Brooks ave., laborer. Finnigan, Frank B., Calumet st., machinist. Fuller, Virgil W., 9 Hall pl., granite agent. Freeborn, James, 1200 Hancock st., gardener. Flynn, Dominick, 56 Hancock st., laborer. Furnald, Channing T., 39 Washington st., clerk. Findlay, Robert, 79 Trafford st., granite cutter. Farnum, George W., 6 Ballou st., blacksmith. Fennessey, James L., 167 Willard st., bookkeeper. Ferriter, John, off Grove st., stonecutter. Foley, Paul E., 193 Willard st., student. Fruth, Frank X., 16 Revere st., stonecutter. Forbes, Walter L., 46 West st., stonecutter. Furbish, Charles A., 3 Douglas st., laborer. Ferguson, Patrick, 61 Warren ave. ext., foreman. Fitzgerald, John, 30 Bryant ave., polisher, Fratus, John L., 151 Hancock st., plumber. Gay, John S., 20 Newcomb pl., carriage painter. Glover, J. Edwin, 68 Washington st., clerk.

Gilcoine, John, 61 Quincy st., stone mason.

Gelotte, Otto, 255 Whitwell st., stonecutter.

Goodridge, Edward L., 39 Granite st., compositor.

Geer, Henry F., 16 Wesson st., granite dealer.

Goodhue, J. Frank, 40 Phipps st., clerk.

Gatcomb, Morris I., Mill st., lumber surveyor.

Goodhue, Augustus J., 9 Cottage st., butcher.

Gallagher, Edward J., 4 Appleton st., clothing cutter.

Geekie, James, 26 Atlantic st., hair dresser.

Golden, John, Sagmore st., moulder.

Hobart, William, 13 Verchild st., shipper.

Hobart, Elisha, 35 Pearl st., brick mason.

Hobart, Winslow, 13 Verchild st., grader.

Hinkley, Howard G., 314 Safford st., insurance.

Hardwick, Justin K. 41½ Granite st., farmer.

Hevahan, Francis J., 33 Common st., stone contractor.

Howley, Andrew W., 57 Phipps st., shoemaker.

Hunter, Charles W., 102 Federal ave., granite dealer.

Hayden, Jesse C., 1126 Hancock st., clerk.

Hedman, Gustaf E., 14 Eustis st., carpenter.

Hallet, Henry L., 8 Myrtle st., foreman.

Hobbs, Ralph W., Clark st., clerk.

Hall, Charles, 1 Graham st., grocer.

Howie, Alexander, 234 Liberty st., stonecutter.

Hayes, Robert J., 24 Cross st., foreman.

Hetherston, John, 14 Bryant ave., stone driller.

Hewitson, Lyman F., 161 Grand View ave., clerk.

Hendrie, Charles R., Henry st., salesman.

Johnson, Julius, 64 Centre st., carpenter.

Johnson, Joseph W., 21 Russell park, provisions.

Jordan, William A., 121 Taylor st., foreman.

Joss, James, 10 Garfield st., granite dealer.

Johanson, Per Victor, 11 Cranch st., polisher.

Kelly, James W., 158 Copeland st., stonecutter.

Kilmartin, John, 53 Crescent st., provision dealer.

Kittredge, Henry P., 32 Chestnut st., variety store.

Kennedy, Joseph G., 92 Quincy ave., granite dealer.

King, William, jr., 2 Kent st., stonecutter.

Keiley, William D., 17 Grove st., blacksmith.

Keating, Albert, 187 Washington st., lumber dealer.

Kingsley, Albert D., Pierce st., moulder.

Kempton, George E., 63 Botolph st., piauo tuner.

King, Benjamin, 239 South Central ave., machinist.

Lizotte, Joseph, 6 Edison st., manufacturer.

Leslie, William J., Everett st., tailor.

Lincoln, Daniel B., 231 Safford st., superintendent.

Lennon, Martin J., 89 Centre st., carpenter.

Lamb, Thomas J., 1 Crescent st., merchant.

Lawton Lucius W., Whalley road, farmer.

Lincoln, Thomas W., 764 Washington st., sail maker.

Litchfield, Elwood M., 40 Baxter st., house painter.

Lathrop, Orlando F., Billings st., railroad employe.

Lord, Charles F., 14 Appleton st., stone mason.

Leslie, Frank, 21 Squantum st., clerk.

Lyons, Charles A., 35 Squantum st., laborer.

McTiernan, John, 16 Common st., granite cutter.

McKenzie, Malcolm, 14 Albertina st., polisher.

McGrath, James J., 2 Franklin pl., quarryman.

McInnis, Miles J., 101 Quincy st., granite dealer.

Martin, Angus D., 16 Jackson st, polisher.

McDonald, Malcolm A., 12 Brooks ave., granite dealer.

Moran, William T., 333 Hancock st., plater.

McFarlane, George, Commonwealth terrace, granite dealer.

McGovern, James P., 79 South st., salesman.

McNally, Michael, 17 Hancock ct., stonecutter.

McPherson, Andrew, 8 South Central ave., commission merchant.

McTear, Ellis M., 191 Beach st., carpenter.

McLane, Bartholomew, 9 Squantum st., machinist.

Myatt, Edward A., Winthrop st., motorman.

Maloney, Stephen H., jr., 239 Farrington st., stone mason.

McDonald, Charles J., 128 Davis st., machinist.

Manhire, John E., 9 Albertina st., stonecutter.

Mitchell, Wellington W., 5 Pleasant st., granite cutter.

McGilvary, John B., 51 Crescent st., stonecutter.

McGowan, John A., 37 Crescent st., blacksmith.

Moriarty, John J., off Grove st., stonecutter.

Morrissette, Arthur J., 25 Crescent street., clerk.

Menhinick, Edwin, 38 South Walnut st., stone contractor.

Moran, Peter, 344 Washington st., conductor.

Magee, Robert, 47 Copeland st., teamster.

Markham, Francis J., 22 Beacon st., draughtsman.

Minnehan, John P., 10 Rustic pl., blacksmith.

McNealy, Joseph J., 1721 Willard st., plumber.

McGuerty, Michael, 15 Old Colony st., nailer.

McNeice, Patrick, 362 Hancock st., laborer.

Manning, Bernard F., 10 Squantum st., clerk.

Mitchell, John R., 15 Quarry st. ex., laborer.

Mullarkey, Michael, 41 Quarry st. ex., stone polisher.

Melzard, George M., 52 Botolph st., salesman.

Maxim, James E., 33 Quincy ave., janitor.

McDonald, John, 307 Water st., granite cutter.

Newcomb, Arthur W., 98 E. Howard st., grocer.

Nicol, Harry S., 250 Water st., granite.

Nash, Lysander W., 114 S. Central ave., real estate.

Nutting, Abel, 20 Payne st., stone mason.

Newcomb, Edwin W., 1 Newcomb pl., shoe manufacturer.

Nightingale, Frank W., 1287 Hancock st., collector.

Nyhan, Daniel J., 329 Hancock st., brass founder.

Nelson, Warren H., Atlantic st., clerk.

Nye, Alfred G., 3 Webster street, painter.

Odom, John S., Charles st., carpenter.

O'Brien, John A., 31 Bates ave., stonecutter.

O'Neil, Michael, 20 Newbury st., stonecutter.

Owens, Charles H., 64 Willard st., clerk.

O'Brien, James, 42 Cross st., stonecutter.

Olson, J. N. Alfred, 10 Ryden st., polisher.

Olney, Albert G., 137 Grand View ave., dry goods.

O'Connell, Cornelius, Madison st., moulder.

Pratt, Frank G., 18 Edwards st., carpenter.

Pratt, Walter F., 401 Washington st., painter.

Pendis, John C., 8 Rogers st., stonecutter.

Prentiss, George H., 32 Eustis st., engineer.

Page, Charles W., 146 Beach st., machinist.

Pearson, John, 7 Squantum st., porter.

Poland, John E., 20 Freeman st., carpenter.

Philbrook, Samuel C., 8 Webster st., wood tank maker.

Phillips, Alexander, 16 Jackson st., granite polisher.

Woodward Institute

To the Mayor and City Council:

Gentlemen: The work accomplished in and for the Institute the past year has been highly satisfactory. The patient devoted efforts of the instructors have met with a hearty response on the part of the scholars, so that the standard of conduct and scholarship was never higher than it is at the present time.

The policy of the Board of Directors to provide every convenience and facility for the acquirement of knowledge has been followed in so far as was deemed consistent with good business management.

It is confidently expected that the results attained the past year will be productive of greater success in the months to come.

The Superintendent's report, giving a detailed statement of present conditions, together with certain needs of the school, follows and to it your attention is respectfully called.

LEON H. AUSTIN,

Secretary of the Board of Directors.

January, 1904.

Report of Superintendent

To the Board of Directors of the Woodward Institute:

GENTLEMEN: The report herewith submitted is, in the series of annual reports of Woodward Institute, the tenth, and, of the Superintendent the third.

The factor which always determines the real character of a school is the teacher. There never was a satisfactory school according to right standards with an unsatisfactory teacher in charge, and, it is safe to predict, there never will be. The school exists for the pupils and, where wise counsel prevails, their needs and welfare will always dominate the choice of teachers. How to improve the conditions and how to meet more fully the needs of the pupils are the most important, and should be the ever present questions in the thought of those having the responsibilities of school management. To allow personal or other considerations to obscure these is to betray the interests of the pupils and the trust imposed. No profession makes a larger demand upon the highest and best qualities of the human mind than teaching. Scholarship is not enough. There must be ability to impart knowledge and to direct study; there must be power to interest and to control; purity and strength of character, refinement of taste and of manners, sound judgment, genuine kindness, patience and appreciation, cheerfulness and unselfishness, tact and all the other qualities of mind and heart which are needed to awaken, stimulate and inspire the thought, ambition and conduct of the learner to their highest aim and best expression.

Our present corps of teachers which possesses to a high degree these most desirable characteristics deserves more than a word of appreciation and commendation. Each teacher seems not only interested in the progress of her classes and in the improvement of her department but anxious to broaden her own

knowledge, to increase her own efficiency and to co-operate with all the others in promoting the general welfare of the pupils. These teachers have a most excellent professional spirit and are doing more and better work than they were a year ago. There seems to be no discords or conflicting aims among them and an atmosphere of respect, confidence and good will pervades the school. Its influence is wholesome in every respect and the girls who can have its advantages are fortunate indeed.

The pupils, too, are doing their part well. There is rarely any occasion for unfavorable criticism of their conduct, and, with few exceptions, they respond satisfactorily to the efforts of the teachers in their behalf. The pupils are acquiring better habits of study, the classes are doing more work and doing it more easily than ever before. Some pupils who did unsatisfactory work last year are doing creditable work this year, the sum total of which is a general improvement in study and scholarship.

The class which will graduate in June promises to be by far the largest in the history of the school, as it will be composed of two sections—those who complete the old course and those who will have met the requirements of the new. Next year all pupils will be following the new course and it will be possible to make a better classification than at present.

The improvement in attendance to which your attention was called in our last report has continued through the past year, giving an average of 91.2, a percentage considerably higher than that for any year of which the records are available. The number of cases of tardiness and dismissal have decreased nearly seventy-five per cent. notwithstanding the increased membership of the school.

Although the Preparatory class was abolished last June the enrolment during the fall term was one hundred sixty-four—nine more than during the preceding year.

The following table shows the class and total enrolment of pupils each year since the school was opened, also the number of regular and special teachers employed:

	Seventh Class.	Sixth Class.	Fifth Class.	Fourth Class.	Third Class.	Junior Class.	Senior Class.	Post Graduates.	Total.	Regular.	Special.	ers.
Spring of 1894, 1894—1895, 1895—1896, 1896—1897, 1897—1898, 1898—1899, 1899—1900, 1900—1901, 1901—1902, 1902—1903, Fall of 1903,	28	15 41 9	17 44 41 29 13 14 20 28 40 55 43	13 18 36 28 22 13 14 18 28 35 46	7 17 10 32 23 17 13 11 15 27 30	5 11 5 28 21 14 14 9 16 25	8 8 5 27 21 14 14 9 15	5 3 2 2 5	80 125 115 107 94 92 85 88 121 155 164	7 8 8 8 8 8 8 7 8	1 2 3 3 3 3 3 2 2	7 9 10 11 11 11 11 11 10 10

The membership has nearly reached the capacity of the school and, if the growth continues, it will soon be necessary to limit either by an examination of all applicants or by some other method, the number admitted each year. Considering the size of the class to graduate in June, the number next year is not likely to be much larger than at present.

Some of the benefits of regular and well-directed physical training are already apparent. In the last report the results of the first measurements of all the pupils were given. The second measurements of the same girls at the end of the year show an improvement in practically every pupil, while more than twenty-five per cent. of the pupils received marked benefit from the year's work. Three cases of spinal curvature were entirely corrected, while the carriage and standing position of many have been greatly improved. Of the new pupils who were measured in September about eighty per cent. had depressed chests but no structural or otherwise serious defects.

During the summer vacation the Blodgett system of electric clocks was installed. This consists of a large regulator or master clock in the Principal's office, a dial and an electric bell in each room and a system of wires connecting all with a large battery in the basement. The dials in the several rooms are

controlled by the master clock and always indicate the same time. By means of a perforated tape in the office clock the bells are rung regularly at such times as desired. In fact besides winding itself and keeping uniform time throughout the building, this clock gives automatically the signals in each room for all changes in the daily program. Before the installation of this system it was impossible to keep the clocks together and it was necessary for some teacher or pupil to go to the office twice each period to give the signals by means of electric bells controlled by push buttons. The person charged with this duty had her attention constantly distracted from her work. most faithful would sometimes forget and then there was confusion and the program of the day more or less upset. one who has not worked under both conditions can fully appreciate the saving of time and of nerve-force by the automatic system. It increases perceptibly the efficiency of the school by preventing loss of time, distraction of attention and waste of nerve-force, to say nothing of habits of promptness and regularity.

Several years ago while repairs were being made the small flag-staff, which was on the building, was removed and the school was without one until last summer when a very handsome mast was placed on the grounds just west of the building. A new flag was purchased and the usual flag days have been regularly observed. Such exercises are just as appropriate in this school as in a school for boys. National loyalty and patriotism are by no means, nor ever have been, confined to the male sex.

The needs of the school which should first receive attention are those of the laboratories and library. The laboratories are very poorly equipped and until considerable apparatus is provided some of the work in science must continue to be unsatisfactory, solely because means for doing it are not at hand, and not through any fault of the teacher.

The library has been neglected. Several sets of reference books are incomplete. There are no volumes of the Annual Cyclopædia latter than the year 1889. Science in any of its branches is hardly represented. The works upon history and the English language cover certain parts of those subjects very well, in other respects they are entirely inadequate. If a small sum

could be devoted to the library each year it could be made a most helpful adjunct to the several departments of the school. Of course the aim should be to make it entirely a reference library, not to duplicate the chief functions of the public library. To teach the pupils how to use a library and books of reference is an important part of education, and a part which should receive more attention. Next to the value of knowing a thing is knowing where and how to find it.

Respectfully submitted,

FRANK E. PARLIN.

December 30, 1903.

EXPLANATIONS

Required work includes subjects which all pupils are expected to take unless excused by the Principal.

With the consent of the Principal a pupil may select from the electives as many subjects as her health and ability will permit. Ordinarily she is expected to elect not less than twelve (12) nor more than fourteen (14) periods per week. The approval of parents should accompany any request to take a greater or less amount of work.

In the column marked "periods" is indicated the number of exercises per week.

In the column marked "credits" is indicated the number of points allowed for satisfactory work in each subject. A total of eighty (80) points or credits entitles a pupil to a diploma. One additional credit will be allowed each year for excellence in conduct and effort.

A pupil in any class may elect from the preceding years' lists any subject which she has not satisfactorily completed.

The course in Household Science and Arts will be offered at the opening of the fall term, 1904.

COURSE OF STUDY IN DETAIL

DEPARTMENT OF ENGLISH

Literature

The first two years of the course in literature are spent in reading carefully, but without attempting analysis and criticism. as much of the world's best literature as the time will allow. The books are selected because they are adapted to the minds of the readers and are worth reading. They include not only English classics but good translations from the literature of various nations and cover many subjects. There are three distinct aims in the course: (1) to teach the students to read intelligently and enjoyably; (2) to develop in them a taste for good literature; (3) to lay a broad foundation for the subsequent study and appreciation of the English classics selected for the third and fourth years. These are taken up in the order of narration, description, exposition, and argument. An outline history of English literature, supplemented by a study of English poets, completes the four years' course.

Rhetoric

One period a week is assigned to each of the three upper classes for the study of Rhetoric.

Composition

Four compositions are required each week from the three upper classes. The work is correlated with the course in literature—narration, description, exposition and argument, each taken in turn. The course is designed to awaken the interests of the pupils in theme-writing and to enable them to express their thoughts clearly and logically.

The pupils are urged to write from their own experience, to write often, to eliminate, by degrees, all faulty expressions, and to acquire the habit of using simple, correct, idiomatic English words.

DEPARTMENT OF PHYSICAL TRAINING

I. General anatomy of the bones and muscles.

Action of the principle muscles.

General anatomy and functions of the blood.

The organs of circulation, respiration, digestion and excretion.

Gymnastic work: three periods a week.

II. General plan and functions of the nervous system.

Peripheral nervous system. Brain and spinal cord.

Lectures on diet, sleep, exercise, bathing, clothing, hygiene for girls, etc.

Gymnastic work: three periods a week.

III. Advanced work in hygiene, nutrition, physiology of exercise, etc.

Gymnastic work: three periods a week.

IV. Anatomy, physiology and hygiene of the organs of the pelvis.

A short practical course in First Aid to the Injured, consisting of lectures, demonstrations and practice. Gymnastic work: two periods a week.

The course in anatomy and physiology is designed to give a clear understanding of the structure and functions of the human organism as a basis for the course in hygiene.

The aim of the course in hygiene is to give a thorough knowledge of the laws of health, and to teach the pupils how to promote not only their own health and happiness, but the health and happiness of those about them.

The gymnastic work consists of a graded course with free movements, light apparatus, military drill, æsthetic movements, athletics and gymnastic games. Interest and enthusiasm in out-of-door sports is encouraged in every way.

At the beginning of the year each pupil is examined, and the *kind* and *amount* of work best adapted to the individual carefully determined.

Dr. Sargent's system of measurements and charts is used. The charts are plotted from the measurements, and enable each one to see exactly in what particulars, and to what degree she differs from the normal standard for girls of her own age. At the end of the year, second measurements are taken and a second chart plotted. A comparison of the two charts shows exactly what changes and improvements have been made during the year.

DEPARTMENT OF MUSIC

The aim of the department of music is to cultivate a taste for good music and to prepare the girls for intelligent and appreciative work in the further pursuit of the art in its various branches.

The course in singing embraces the study of solfeggiorythm, sight reading, dynamics, breath control, intonation, enunciation, unison and part singing.

The theoretical work aims to give the pupil a thorough foundation in the elements of music and includes knowledge of intervals, the derivation and construction of our present day tonalities, major and all minor forms.

Triads—The chords of the Dominant seventh and Diminished seventh. Cadences and harmonic and thematic analysis.

Individual class work, one period each week; united class work, one period weekly.

DEPARTMENT OF HISTORY

- I. A preliminary consideration of the origin and races of mankind,—their primitive condition, migrations, and progress toward civilization.
 - A brief study of the extinct civilizations of the East. Greek history to the death of Alexander.
- II. Roman history from the founding of the city to the fall of the empire.
- III. English history from the Roman invasion to the accession of Edward VII.
- IV. American history, special attention being given to the forces which have shaped the government of the United States and developed its present institutions.

Civil government of the United States.

DEPARTMENT OF SCIENCE

I. Introduction to science,—training in careful observation and scientific methods as a preparation for subsequent work.

The evolution of the solar system and the formation of the earth.

The elementary facts of astronomy and geology.

The examination of a few of the common minerals and rocks.

The systematic observation and record of some common phenomena.

Simple experiments to ascertain facts or to test given propositions.

The classification of facts under divisions of science.

II. Zoology, first half year.

The time is about evenly divided between laboratory and recitation work.

Elementary work in morphology, physiology and some ecology.

Botany, second half year.

There is considerable field work for the purpose of identifying plants, studying their habitat and procuring specimens for a small herbarium.

III. Chemistry or Physics.

A class in one subject only will be formed for those electing science in the third year.

IV. Physics or Chemistry.

The subject not taken in the third year is offered in the fourth.

DEPARTMENT OF MATHEMATICS

- I. Original work in inspectional geometry and elementary algebra.
- II. Elementary algebra completed.
- III. Plane geometry,—demonstrations and original work.
- IV. Solid geometry or advanced work in algebra.

DEPARTMENT OF LATIN AND GREEK

Latin

- I. Latin Lessons.Translation of prose selections.
- II. Cæsar—Commentaries on Gallic War, books I-IV inclusive Sight reading.
 Prose composition.
 Grammar.
- III. Cicero,—Orations against Catiline, The Manilian Law, and Archias.Sight reading.Prose composition.
- IV. Virgil,—Æneid, books I-VI inclusive.Sight reading.Prosody.

Greek

- I. Greek Lessons.Translation of easy Greek narrative.
- II. Zenophon,—Anabasis, books I-IV inclusive.Sight reading.Prose composition.
- III. Homer,—Iliad, books I-III inclusive.Sight reading.Prose composition based upon Attic Greek.

DEPARTMENT OF MODERN LANGUAGES

French

I. Pronunciation.

Grammar: Declension.

Conjugation of regular verbs and of a few

irregular verbs.

Simpler uses of tenses and moods.

Syntax.

Memorizing: Vocabulary for oral and written work.

Prose and poetry selections.

Composition: Translation into French.

Transposition. Reproduction.

Dictation.

Easy conversation.

Reading of simple French.

II. Grammar: Rapid review of grammar.

Conjugation of irregular verbs.

Uses of tenses and moods.

Memorizing: Vocabulary enlarged.

Idioms.

Prose and poetry selections.

Composition: Translation into French.

Transposition. Paraphrasing.

Dictation.

Easy conversation.

Reading: Contes de Fees, Merimee's Colomba.

Sandeau's Le Gendre de M. Poirier.

III. Grammar: Review and continuation of difficult points.

Syntax.

Memorizing.

Composition: Translation into French.

Transposition. Paraphrasing.

Abstracts.

Dictation.

Conversation.

Reading: Selections from Zola, Maupassant, Balzac,

Hugo, Daudet, Loti.

Corneille's Le Cid, Racine's Athalie,

Moliere's L'Avare.

German

I. Pronunciation.

Grammar: Declension.

Conjugation of weak verbs and of the

more usual strong verbs.

Simpler uses of tenses and moods.

Prepositions.

Syntax.

Memorizing: Vocabulary for oral and written work.

Prose and poetry selections.

Composition: Translation into German.

Transposition. Reproduction.

Dictation.

Easy conversation.

Reading and translation of Fairy Tales.

II. Grammar: Conjugation of strong and irregular verbs

and modal auxiliaries.

Order of words.

Translation: Schiller's "Der Neffe als Onkel."

Benedix' "Eigensinn."

Gerstacker's "Germelshausen."

Lyrics and Folksongs.

Sight reading from easy texts.

III. Prose Composition.

Exercises in idiomatic German, including letter writing, short dialogues and descriptive themes.

Conversation.

Translation: Lessings' "Minna von Barnhelm."

Schiller's "Jungfrau von Orleans."

DEPARTMENT OF BUSINESS

Commercial Arithmetic I. Subjects: Common and decimal fractions, common measures, interest, percentage, discount, insurance, taxes, duties, exchange, partnership. After a review of fundamental processes pupils are drilled in business methods.

Bookkeeping I. The principles of double and single entry bookkeeping are presented in a clear and practical manner. Neatness and accuracy are insisted upon.

Bookkeeping II. The work of the previous year is continued, giving, as far as is possible in a school, business practice.

Stenography I. The principles of stenography are learned and practice in reading and writing shorthand is begun.

- Stenography II. Regular and systematic practice in reading and writing shorthand is continued in order to secure accuracy and speed.
- Typewriting I. After the use of the typewriter has been learned, practice is given in writing from shorthand notes and from dictation.
- Typewriting II. The practice of the preceding year is continued and pupils are taught to use at least one standard duplicator.

DEPARTMENT OF ART

The study of art must necessarily be considered as a whole rather than the work of different classes; therefore, the course of drawing is arranged to meet the needs of the individual student and is varied to suit any requirements.

Pupils are not only fitted for continuing their studies in advanced schools but also to appreciate the best in art.

The general plan is as follows:

Free-hand drawing of objects in pencil, and pen and ink, and principles of perspective.

Study of form, light and shade.

Study of design, applied decoration.

Study of color in water colors and in oil.

Modelling and casting.

Mechanical drawing.

GRADUATION EXERCISES

Wednesday evening, June 17, 1903.

PROGRAM

1. Music by the School.

Under the direction of Mr. John D. Buckingham.

- 2. Address,—Subject: The Uses of a School. Rev. George Hodges, D. D.
- 3. Conferring Diplomas.

Rev. Ellery C. Butler.

CLASS ODE

Written by Annie E. Carter

Year by year we've toiled together,
Toiled in harmony, not strife,
With a fervent admiration
For the virtues in each life.
"Strong to Live" will be our purpose,
Even though beset with fears,
And our love for one another
Will but strengthen with the years.

Many grateful words are spoken,
Many noble deeds are done,
Which we'll hold in sweet remembrance,
With kind thoughts for everyone.
Nought but friendship lies between us
With its charms so true and bright,—
Such an impulse should uplift us
To a noble, lofty height.

CLASS OF 1903

Annie Eliza Carter, Zita Mechtilde Fegan, Alice Gertrude Jones, Grace Marion Lapham, Rachel Mary Doble, Katharine Davis Hardwick, Annie Lane Keefe, Elizabeth Brown Merrill,

Ethel Randall.

CALENDAR FOR 1904

Winter term: Monday, Jan. 4,—Wednesday, March 23.

Founder's Day: Saturday, March 12.

Spring term: Monday April 4,—Friday, June 24.

Graduation: Wednesday, June 22.

Entrance examination: Friday, June 24 and Monday, September 12, at nine o'clock A. M.

Fall term: Monday, September 12,—Wednesday, December 21.

New Year: Monday, January 2, 1905.

Holidays: February 22, April 19, May 30, June 17, and the remainder of the week from Wednesday noon next preceding Thanksgiving.

Report of the School Committee

To the Citizens of Quincy:

There are three subjects to which the attention of the citizens of Quincy is urgently and most respectfully invited by their School Committee.

First: — School accommodations.

Second: — School expenses.

Third: — Efficiency of the schools as affected by the personal attention of parents to the work of their children.

(1) SCHOOL ACCOMMODATIONS

This is a subject mentioned in almost every school report for the last ten or fifteen years and always with sufficient reason.

When Quincy became a city in 1889, there were in its schools 2,619 children, and its property was valued at \$12,319,245.00. Today, there are 5,111 school children, and the valuation is \$23,074,315.00—the proportional increase in property and children being about equal. During this time, the Willard, Lincoln, High, Massachusetts Fields, Gridley Bryant, Cranch, and Washington schools have been built at a great outlay of money. They are all brick buildings, in which the citizens of Quincy can take just pride and satisfaction. They are as good as the times demand, but not better.

In all these years, there has not been a time when more and better school rooms than were available have not been actually needed.

By a very little more yearly outlay, this condition might have been avoided and children not have been compelled to attend school in a basement, as is the case with twenty-five children in the Coddington, nor to have been over crowded as at the Lincoln; where, today eighty pupils of two different classes recite to two teachers in a room intended to accommodate forty,—a pursuit of knowledge under great difficulties. One class in this building, also, has been located in the basement. Whenever the call has been made for new schoolhouses, time has always proved the wisdom of the request.

The school children of Quincy are increasing at the rate of about two hundred twenty-five per year, thus necessitating the construction of a building as large as the Cranch every two years. To be specific as to the immediate needs:—

A schoolhouse should be built at Atlantic and, at the earliest feasible date, the High School building should be enlarged.

The Conditions at Atlantic

The present building is not constructed in accordance with the requirements of the laws of Massachusetts and there are in the seven lower grades an average of fifty-four scholars where there should be but forty. For several years, sixty to eighty pupils have been cared for in a building not owned by the city, for which a yearly rent of about \$500 has been paid. A new school-house at Atlantic would provide also for an increase of children at Norfolk Downs where there are already four hundred scholars.

The Needs of the High School

In 1901, the attention of the City Council was called to the situation here. Today, there are six hundred pupils in this school. Of this number, one hundred thirty-five are located in the old High School house, a mile away from the principal, in unhygienic and uncomfortable surroundings. For lack of space elsewhere, the typewriters are crowded into the corridors.

In the new High School building, which has accommodations for three hundred fifty only, there are four hundred thirty-five scholars; consequently two classes are compelled to recite in the corridors; one in the principal's private office, and the typewriters are in a room lighted only by artificial means. The building is crowded in every way. This condition might have been avoided by the payment of some \$2,000 or less of interest money, yearly. All who have any influence in giving to our High School scholars ample, healthful, and suitable rooms should see that this is done. The city can have no more urgent need in any

other direction. No greater problem confronts Quincy, or its servants, the City Council and the School Committee, than this one of school accommodations. Whatever other public interest may suffer, the reasonable demand of the times is that our boys and girls be better instructed than ever before. It is hardly necessary to say that to best accomplish this, school houses, ample and healthful are needed.

(2) SCHOOL EXPENSES

During these times of great material prosperity and of lavish expenditures in country, state and town, it becomes every public servant to consider carefully the responsibility laid upon him in the spending of public money.

As to the cost of conducting our schools, the following table is interesting and instructive:—

Year.	Cost per Pupil in Quincy.	Cost per Pupil in the State.	Per cent, of Appropriation for Support of Schools in Quincy.	Dollars per \$1,000, based on Valuation in State.
1893	\$24.17	*	.28	\$2.69
1894	22.56	23.88	.25	2.73
1895	22.23	24.73	.27	2.81
1896	22.50	25.10	.26	2.89
1897	23.44	25.22	.27	2.95
1898	22.27	25.63	.26	3.53
1899	22.47	26.06	.25	3.62
1900	22.21	26.73	.23	3.62
1901	22.67	26.49	.25	3.63
1902	21.97	27.04	.24	3.70
1903	21.45	27.30	.23	3.71

^{*} Data not available.

This table shows that whereas the cost per pupil in the schools of Quincy has decreased from year to year,—being \$24.17 in 1893 and \$21.45 in 1903,— in the state, the tendency has been for the cost per pupil to increase, and it has actually risen from \$23.88 in 1894 to \$27.30 in 1903. It shows further that in Quincy a smaller percentage of the city's appropriation is being used for the support of schools, while the reverse is true in the state. Consequently, the other departments must be expending a larger proportion of the city's money than formerly. Whether

this is cause for congratulation may be questioned, but the fact remains and should receive the careful consideration of those in charge of the city's finances.

(3.) THE EFFICIENCY OF THE SCHOOLS

as affected by the personal attention of parents to the work of their children. There is very little reason or intention to enlarge on this thought.

Parents, when you think that your children are not doing in school as well as they ought, or when you hear something in regard to the school which you fear is not as it should be, you can do no greater good to your children and to the school, than by personally investigating. You may thus, not only influence your children to do better and their teachers to take more interest in them but you may find, as has often been the case, that the reported grievances were unfounded.

Having called attention to the three topics of this report, it is fitting to add in conclusion that good work is being done in the schools of Quincy; that there is great effort on the part of the teachers, inspired by the untiring and well-directed zeal of the Superintendent, Mr. Parlin, to foster what Horace Mann says should be heard in every school,—"the hum of business;" and to graduate boys and girls of good character, and with right aims in life.

May Superintendent and Teachers receive the co-operation of us all!

The above report was presented by a special committee consisting of Dr. Record, Dr. Hallowell and Chairman Porter, and was adopted as the annual report of the School Committee, Tuesday, December twenty-ninth, 1903.

FRANK E. PARLIN, Secretary.

Report of the Superintendent

To the School Committee of Quincy:

I have the honor to submit herewith my fourth annual report which is the twenty-ninth in the series of annual reports by the superintendents of public schools and the fifty-fourth of the printed reports of the Quincy School Board.

THE MORAL SIDE OF EDUCATION

The physical side of education having been considered in our last report, it now seems desirable to examine the moral side of education since it is such an important part of education. It certainly is pertinent for all interested in the public schools to ask what they are doing or can do to promote the right moral development of the children.

To insure the highest moral conduct one needs more than a sensitive conscience and right motives. He needs broad intelligence, sound judgment, a strong will and courage as well, otherwise his acts may be thoroughly conscientious and prompted by good motives but nevertheless unwise and harmful because he lacks knowledge or judgment. It is well to *intend* the right, but it is also important to *know* the right.

Careful observation and analysis will convince most persons that man's moral life is closely interwoven with his physical and intellectual life. Some of us have known of cases where moral reform began with a bath and clean clothes.

Many talk as though the human mind were divided into several separate and distinct parts and that the education of one part had nothing whatever to do with the others—as though physical training involves only bone and muscle and that the cultivation of the feelings, the intellect or the will in no way affects the moral development.

The mind always maintains its unity however varied the modes of its expression—whether it manifests itself as feeling,

intellect or will; whether the feeling be pain or remorse, whether the intellect acts in the field of mathematics or of morals, whether the will deals with trifles or with truth. It is utterly impossible for one to receive a purely intellectual education. The driest lesson in grammar involves the feelings and the will and, to some degree, moral elements.

Some of the methods of moral education advocated and some of the demands made upon the schools in this connection must be rejected by those who understand the true nature of children and of morals, if they would serve the highest interests of both.

The demand for formal instruction in morals usually comes from those who have little knowledge of the schools or from those who seem to have religious instruction in mind. It is not necessary to discuss this question since with us church and state are separated and religious instruction is impossible. funds can never be used justly to inculcate the tenets of any church. Commissioner Harris has clearly shown that religion cannot be taught by the methods used in teaching the school subjects. To learn a creed or catechism is not to learn a religion in any vital or important sense. It is merely learning about a religion—a purely intellectual act, moreover as the children are actually in school only about twelve per cent of the time each year, it would seem that the home and the church, the proper teachers of religion, should find ample time during the remaining eighty-eight per cent for all necessary formal instruction in this subject. Those who ask for religious instruction will do well to examine carefully the results of such instruction in European schools, as they appear both in the feelings of the people and in the character of the pupils. The whole tendency of modern civilization is towards the complete separation of church and state.

Although religious instruction in American schools is out of the question, there is a position where all can meet in agreement and that is upon the ground of the fundamental moral virtues. Religions multiply and creeds change but moral principles are the same yesterday, to-day and forever, and no sane mind ever questions or objects to them. The great need of mankind everywhere is practical everyday ethics. All are willing their children should be taught to be honest, just and kind, that they should develop courage, self-respect and self-control, and should learn to be courteous, industrious and patriotic. This field is open and gives ample scope for the teacher's best *skill* and greatest wisdom. If properly cultivated, it will yield great good to the children, a just service to the state and real benefit to religion.

The instruction should deal with moral principles and not attempt to consider all moral subjects. Fine spun casuistry and mooted moral questions should be excluded. Attention should be given to developing a clear moral perception, a discriminating moral judgment and a deep respect for the fundamental virtues. The rest should be left, at least so far as the schools are concerned, to the intelligence and conscience of the individual.

But how are morals to be taught in the schools? Certainly not by set lessons from a textbook upon ethics.

Socrates said, "Now I, Protagoras, when I reflect on all this, am inclined to think that virtue cannot be taught," and undoubtedly Socrates is right. At least, virtue cannot be taught by a direct formal method of instruction, for such instruction calls into exercise little more than the intellectual powers. It does not necessarily touch the learner's moral life. A knowledge of ethics is good, but it is not morality. Moral development comes from the exercise of the emotions, judgment and will upon moral matters — questions of moral right and wrong and of conduct. One may be master of all ethical doctrine and yet be a knave or he may be ignorant of them all and be a saint. But one cannot feel right and choose right and act right without being morally right.

Children in the elementary schools are not only unprepared for abstract formal ethical instruction from which they get very vague and incorrect if not harmful notions, but they are very shy as soon as they suspect the instruction is aimed at them. They soon tire and tend to become hypocritical, but hypocrisy is the door through which many vices may enter. Although regular formal lessons in morals are useless or worse, there are times, which the wise teacher will recognize and improve, for direct moral instruction. Something unusual involving a question of right and wrong has happened in the schoolroom or upon the playground or in the community and the school is in just the

right mental condition to consider seriously the moral aspect of the matter. Generally the discussion should be impersonal. It is not wise to discuss before a class the conduct of one of its members, whether that conduct be good or bad, because the feelings of the class become too active for right judgment and because that member is injured by such conspicuous praise or Neither self-righteousness nor loss of self-respect is a virtue. When the class is ready, an apt story will present a moral question in a concrete and acceptable form. If the discussion is conducted in a serious but sympathetic manner and the teacher really feels the importance of the lesson, it will make an impression upon the minds of the children which will not soon be forgotten. Such lessons should not be so frequent as to become common and of no unusual importance in the thought of the pupils, for their very rarity gives them dignity and impressiveness. Much direct moral instruction tends to make the sensitive child morbidly conscientious and unhappy, while it tends to make the phlegmatic child callous and indifferent to moral appeal.

By far the most potent and lasting moral lessons children learn at school are from the influence and example of the teacher. These lessons are concrete, objective and real, given in ways the children can feel and appreciate. They are daily lived out before the children's eyes and are involved as prominent factors in the actual experience and life of the children, making them happy or unhappy, calling forth their admiration or dislike, approval or condemnation, inspiring hope, ambition and high ideals or fear, meanness and despair. Children judge the conduct of their teacher and read his character with great accuracy. They do not reason it out. They feel it and know it intuitively. They know when he is lazy and selfish, ignorant and conceited, unfair and cowardly, unjust and passionate, when he is insincere, unkind or unmanly, and they know when he is true, kind, just and noble. A teacher who is courteous, frank and fair, who is master of his work and of himself and who governs his pupils honestly, intelligently and sympathetically, impresses upon their minds in the most effective manner possible the beauty, worth and wisdom of right conduct. He becomes their ideal and inspires them with a desire to acquire the virtues which he makes so pleasant and attractive. They approve even the justice from which they sometimes suffer.

The virtues cannot be successfully assumed by the teacher. He must ring true every time or his pupils detect the counterfeit and despise the fraud. His real character shows itself in a thousand telltale ways,—in the eye and expression of the face, in the smile, in the curve of the lips, in the tone and inflection of the voice, in the little words which slip from the tongue, in the touch of the hand, in the toss of the head and in the very atmosphere of his presence.

Profoundly important as such a teacher is during every period of a child's life he is supremely important during the period from twelve to sixteen, the age at which boys and girls are most susceptible to influences and the moral aspect of things appeals to them most strongly, when they begin to feel that life is calling them to independent action, when ambition is awakened and ideals are formed, the period when a noble influence will do most good or an evil one most harm.

The character of the school government is simply an expression of the character of the teacher. Through it his relations to his pupils are most intimate, his moral qualities most conspicuous, his influence most direct and impressive. It matters little what he says about justice, honesty, courtesy, kindness and selfcontrol, if his conduct is at variance with his teaching. If in governing his school he practices these virtues, there will be small need of his talking about them, but, if he does talk, his words will be accepted because his example confirms them. Nothing injures children more than the bad manners, capricious temper, hasty judgments, abusive remarks and unjust punishments of their teacher. Scolding and nagging yield only evil and that continually. Sarcasm alone has permanently injured many a child. It matters not how brilliant his intellect, a cold, selfish unsympathetic soul has no business teaching children. Pardon the expression, but with children morals are caught rather than taught.

The school government is especially important in the moral development of the pupils because it provides for *practice* in morals — for completing the moral circuit by carrying the moral judgment into execution. It is not enough for one to know the

right, he must do it. Moral conduct is the fruit and proof of moral life. The great trouble is not with our moral perception or moral judgment but with our action. Not instruction in the moral virtues but the practice of those virtues makes character. Children should be instructed, should be lead to examine moral questions and to pass judgment upon them, but they must also be led to choose and to act, and to act habitually in harmony with that judgment, ever remembering that the heart of a moral act is the motive which prompts it. Neatness, politeness, promptness, self-control, obedience to law, faithfulness to duty, honesty in work, fairness in play and consideration for the rights and feelings of others should be required of all, and constant practice will tend to make such conduct easy and habitual.

The playground properly supervised is no less important in the moral than in the physical development of the pupils.

One caution the teacher should observe,—a child may sometimes be compelled to do what he knows he ought to do, but never what he sincerely believes he ought not to do.

But moral instruction in the schools is by no means confined to the influence of the teacher and to occasional direct teaching. The various studies offer constant opportunities for such instruction. It is indirect but nevertheless impressive and lasting. With a competent teacher, the children will meet in biography, history and literature questions of right and wrong, of truth and falsehood, of justice and injustice, of kindness and cruelty, of courage and cowardice, of self-control and passion, of honor and meanness, which they will judge and approve or condemn with increasing discrimination. Next to the living example of the teacher is the conduct of men and women as represented in literature. It is assumed that good literature, adapted to the age of the child, is provided in abundance. Unfortunately many teachers either do not see the moral elements in literature or do not know how to use them. They are so taken up with pronouncing words, dissecting the language or correlating subjects that the feelings, motives and conduct of the various characters pass unnoticed. But this is better than for the teacher to make every action of the characters a text for a moral lecture to the class. Not the moral judgment of the teacher but that of the pupils is desired. The teacher should not insist that their judgments agree with his. It is much more important that a pupil be honest in his opinion than that he agree with the teacher. Questions should be asked which will lead the pupils to consider the conduct of the characters, to discuss the conditions under which they act and to judge of the motives and propriety of that action. In this way the moral feelings of pupils will be awakened and the moral judgment made more just and discriminating.

The moral benefits derived from the study of science are not generally appreciated. Its influence works slowly but deeply. It gives steadiness, confidence and serenity to the mind. It banishes fear and superstition; fosters respect for law, an appreciation of small things and reverence for creative wisdom and power; tends to set things in their right relations and to assign them their proper values; to place life upon principles, to make one thoughtful and able to work patiently for distant ends. The best proof of this is the lives of the world's scientists. One who studies those lives will soon be impressed by the beauty and richness of their ethical qualities. The scientists have never been persecutors of their fellow-men. Intellectual honesty leads to moral honesty.

No one familiar with the results of manual training in the public school, among the Indians and negroes or in the reformatory institutions can fail to discover its moral value. first it is a sort of muscular morality but it soon strikes in and touches the thought and life of the worker, or perhaps it would be better to say that the ideas of propriety, exactness, neatness, beauty and utility springing up in the mind and working themselves out through the muscles react upon the life and mould the character. As a boy struggles for the mastery of eye, hand and tool; as he fashions the material into exact, pleasing and useful shapes; and as he works by the side of his richer or poorer neighbor he acquires habits of exactness and a wholesome respect for honest work. He gains not only a mastery of materials but of himself. Physical accuracy is the result of Manual labor under right conditions has mental accuracy. always promoted the moral health of the worker.

Those who have carefully observed the effects of a neat and pleasant schoolroom equipped with good furniture and adorned.

with well-chosen pictures are convinced of its positive moral influence.

Undoubtedly a school can be found occasionally in which the moral influences are not such as are desired but this is a rare exception. It certainly is not true that the moral education of the children in the public schools is being neglected and we believe the morals of children to-day will compare favorably with those of children of any past time.

The schools have their defects but they foster neither anarchy, immorality nor irreverence. An examination of the criminal records or the entries of penal and reformatory institutions will reveal few names of graduates of the public schools. Every worthy teacher desires above everything else that the boys and girls under his instruction may develop into true, noble, law-abiding, man-loving, God-revering men and women—the honor of society, the strength of the nation, the friends of humanity—and those who know the facts believe this desire is being realized to a creditable degree.

HIGH SCHOOL ENGLISH

The most important subject in the high school curriculum is English. It is the one subject of which all will make a practical use throughout their lives, in speaking, reading and writing; yet the methods of instruction both in literature and in composition have generally been less satisfactory than in other subjects. Undoubtedly it is the most difficult subject to teach and there are many unfavorable conditions over which the teacher has no control.

Much is said about the poor English used by high school graduates. Conceding the fact that many graduates do use poor English, it does not follow that the schools are entirely responsible. Children catch their speech from their associates during childhood and bad vocal habits fixed by long practice are exceedingly hard to correct. Many well educated persons who in early years were accustomed to defective language are sometimes chagrined by having some of those faults slip from their tongues at an unguarded moment. Notwithstanding their complete knowledge of the errors the nerves and muscles tend strongly to perpetuate the language habits of childhood. The child who

during the years he is learning to speak always hears his mother tongue in its purity is fortunate indeed. The school not being able to regulate the speech of the home must take the children as they come and do its best to correct the faults for which environment is entirely responsible.

The school first needs to adopt definite and systematic methods of training its pupils in the use of good oral language. Even some teachers expect this to be accomplished directly through the study of English grammar and rhetoric, but it cannot. These studies furnish the pupil with a criterion for testing language so that he may know when errors exist but they do not directly affect his speech. One may know every law of grammar and yet unconsciously through habit violate them all. It is only by much practice under intelligent guidance and by constant watchfulness that one can break up old faults and fix new and right habits of speech. The school should furnish and does furnish opportunities for such practice but they are not fully utilized, chiefly because everything in this line is left to the teacher of English. Every oral recitation is practice in the use of English and every teacher should be held responsible for the solecisms which pass unchallenged in his recitations. If he is, the pupils will get five or six times as much practice under guidance as in the English classes alone. Throughout the school correct language should be the invariable standard. When a mistake is made, it is not enough for the teacher to point it out, but the student should correct himself and present his thought in proper form.

A most excellent opportunity for practice in good English is offered in translating foreign languages, but too often no one seems aware of it. To translate the Latin and Greek classics or French and German literature into barbarous English is an exercise of more than doubtful value. One studies Latin and Greek that he may know and master English but when the study leads to constant practice in bad English it is sorry business.

The explanations and demonstrations in mathematics, the descriptions in science, and the recitations in history should always be made to serve as right practice in oral language. The pupils should understand that the language used in a recitation is an important factor. How can the school ever hope to correct

the speech of its pupils when only one teacher in five pays any attention to it? Such a ratio is not well calculated to secure rapid improvement. When additional oral practice is needed it may be secured by having special exercises in the English classes for speaking — narrations, descriptions, debates and conversations upon assigned topics.

The study of literature is another part of the work in English. It certainly should be an enjoyable part for both pupil and teacher. The fact that so many pupils find it most disagreeable drudgery proves either that the methods of instruction are not well chosen or that the work is not adapted to their ability, or both. Most pupils on entering the high school have read little classic English. This has been the fault of the reading course in the grammar school and of the home reading. The first aim in the high school should be to teach the pupils how to read intelligently and enjoyably. This can be done only by reading literature adapted to the development of the pupils. Any, one familiar with the reading prescribed in the "college requirements" and with the usual condition of pupils entering the high school can see at once that much of it is not adapted to their needs and that some of it should not be attempted below the college course. Why then should it be forced upon youth when there is an ample supply of literature which will not discourage reading? It is exceedingly unwise and unfortunate to require the reading of a classic at such a time or in such a way that it becomes in the thought of boys and girls the very synonym of incomprehensibility and dullness. It is better not to require the reading of a book than to have the reading result in unpleasant memories and a firm resolution never to look at it again:

The first two years of the course in literature should be given to reading for intellectual food and enjoyment, for the purpose of creating an appetite and developing a taste. The pupils should be led to read so as to get at the spirit and meaning of the author — the heart of the book — without the creeping, critical, dissecting process. Literary anatomy is out of place here. The pupils at this age need the scenes and characters, the life and feeling, the humor and pathos, the real kernel and substance of the book, the very elements the author labored hardest to put into it; and these are not found by constantly

chewing the husks of language. The first thing to teach the boys and girls is how to read a book so as to get at its thought and life, and at the same time help them to become intelligent and interested readers of wholesome books; afterwards, when they have some knowledge of literature, some standards for comparison and judgment, we may more reasonably try to make them literary critics. A sound literary taste and judgment, however, are acquired by reading much sound literature rather than by tearing a small amount of such literature to pieces. We very much doubt that teachers of English use in their private reading the methods they often require of pupils at at school.

During the first two years, at least, there should be much more reading and much less dissecting. An ample list of books adapted to the minds of the pupils, carefully selected from the different classes of literature and including some translations of foreign classics, should be arranged for them and then they should read; read some in class, read others at home and discuss them in class, read carefully parts of some and all of a few a second time, memorizing short extracts of special beauty or strength. But above all the introduction of the pupils to the world's classics should be enjoyable and not a "grind."

Few persons, even adults, enjoy reading the best literature. Their taste has been vitiated and they have been made intellectually lazy by reading weak, scrappy or sensational literature. If one's reading be weak, his thought is weak and commonplace, his mental tissue is flabby; if it be scrappy, he becomes incapable of sustained thought, of following a course of close reasoning or the development of a theme; if sensational, he becomes mentally passive, he can neither think without stimulation, nor enjoy the companionship of great books. A great book requires an active mind and then it strengthens thought, broadens the imagination, deepens the feelings, nourishes the soul and enriches the life. When one has learned to enjoy good literature he has not only secured as lifelong friends some of the world's greatest minds at their best, but he has acquired a taste which finds literary trash offensive.

During the last two years of the course, after the pupils have some knowledge and appreciation of literature, more at-

tention may be given to the means employed by masters of the art to produce literary effect, but this should be for the purpose of bringing into clearer light the beauty of conception, the strength of expression, the vividness of description, the delicacy of feeling, or the harmony with nature and with right ethical standards. It should not degenerate into mere language study and verbal analysis, for this would be like studying a picture by examining the paint and inspecting the canvas.

It cannot reasonably be expected that high school pupils will exhaust the meaning or fully appreciate the merits of a masterpiece, or that they will get as much out of it as the teacher who has studied it for years. In working with them, it is not wise to keep halting and trying to squeeze the last idea or emotion out of the language. By being extremely analytical and critical in minor parts the pupils lose much of the unity, strength and beauty of the whole.

The college requirements and examinations are responsible for much of the abuse of literature in the high schools. Literature suffers because too much time is given to study about literature. The work smells too much of the laboratory. Even the biography of the author is no more essential to the study and enjoyment of his writings than the biography of the architect or composer is to the enjoyment of a cathedral or a symphony. The authors of some of the best literature in the world are absolutely unknown and yet it lives and we enjoy it. It is well to learn about an author's life and work, but such study should not be confounded with a study of literature.

A third and very important part of the work in English is composition. The prime requisite for good writing is a good subject—one adapted to the writer because he has an interest in it and knows something about it. When one has something to say—is full of his subject—writing is made comparatively easy. Even beginners enjoy it and take pride in the exercise of a new power and in the practice of a new art. But to write upon a subject when one has nothing to say is much like trying to pump water from a dry well—much labor and little to show for it. A more effective plan for wasting time and energy and for discouraging writing could hardly be devised. In no way can the teacher

remove as many difficulties and promote as rapid improvement in composition as by the careful assignment of subjects. An excellent subject for one member of a class may be a very poor one for the rest, and few subjects are equally good for all. Generally too many class subjects and too few individual subjects are assigned. Too many subjects are based directly upon the literature being read, and too few upon the life and experience of the pupils themselves. The pupils can easily be led to suggest to the teacher subjects in which they are interested. They may not be abstract or classic themes but they will be subjects about which the pupils have something to say and to which is attached the special interest of proprietorship. It is their own and a part of themselves. Such subjects have the additional advantage of throwing side lights upon the real life and thought of the writer.

Having selected a subject the pupil should think it carefully over and decide how he will develop it. At first it may be well for him to make an outline of the main thought of the several paragraphs, but he should not be required to work upon the outline until the glow of interest in the subject has begun to fade. The prepartion of the outline should serve the triple purpose of kindling interest, of stimulating thought and of setting that thought in orderly arrangement. When he is full of the subject and wants to write, the pupil should write with one precept in mind, which is to try to express his thoughts correctly, clearly, concisely and forcibly.

No effort should be made to get the pupil to imitate in his writing the style of anyone. Style is an individual quality and is acquired by writing and speaking rather than by reading. The individuality of the pupil should be respected. Some teachers persist in recasting compositions apparently because the pupil does not express his thoughts as they would. So long as the writer uses good English and has ideas to express he should not only be allowed but encouraged to express them in his own style. Imitation of style whether in writing or speaking is the acknowledgment of inferiority. Originality is the offspring of individuality and is altogether too rare and too promising a child to be neglected. Everyone may not be able to give new thought to the world, but, if he can present old thought in a new and

forceful way, he will secure a hearing. The young writer should be encouraged to be himself and to be natural, simple and direct.

One will never become an easy and finished writer without hard work. It will require both thought and practice. Paragraph writing in which the pupil studies to express a group of closely related thoughts as briefly and clearly as possible is most excellent practice. The emphasis is placed where it belongs upon quality, not upon quantity, and the pupil is willing to revise until he succeeds in producing a well constructed paragraph, conveying his meaning adequately and exactly.

The custom of assigning pupils a subject and requiring them to write immediately a certain number of pages or for a given length of time may have some redeeming features, but it certainly does not encourage good composition. Just why a paragraph of ideas should be scattered through a page of words is not apparent. Easy writing usually proves very tiresome reading. Inspiration is not so common that it comes on call. An inspiration of ideas is the prime need, then the pupil must labor to give them definite and appropriate expression. He should not be satisfied merely to string out a multitude of words in grammatical order under a given subject.

The pupil should share largely in the criticism of the compositions. When a pupil has finished a paper it should be handed to another for examination and criticism according to a definite system of marks. For instance, S may mean incorrect spelling; G, defective grammar; ¶, a new paragraph; ?, a query as to fact or meaning; R, redundant; W, wrong use of a word; etc. The critic makes no corrections but places these characters in colored ink so as to indicate all the defects he is able to discover, then the paper goes back to the writer. If the critic makes mistakes in marking, it is the duty of the writer to defend his composition, otherwise it is his duty to correct it in accordance with the marking. By this method the critic receives no less benefit than the writer for he is held responsible not only for his criticisms but for the errors which escape him.

GEOGRAPHY

In the teachers' meetings during the year some special attention has been given to this subject.

Paradoxical as it may seem, the center of interest and of importance in the study of geography is man not the earth. What is its relation to man? is the prime question throughout the subject.

In studying geography the great aims are, to increase one's knowledge of human life, customs and conditions in order that he may improve his own and that his interests and sympathies may be broadened; to learn the terrestrial helps and hindrances to human effort in order that he may, as far as possible, work with nature; and to enable one adequately to localize places, peoples, historic scenes and current events. In addition to these there are the ends common to all studies—mental discipline, etc.

The general plan of unfolding the subject should be, to begin with simple observations, experiments and exercises in the schoolroom and its vicinity and proceed synthetically to the study of the city or town, the county very briefly, the state, New England briefly, the United States, the continents and the earth as a whole; then to study the world and its parts analytically and comparatively, giving special attention to the city, the state and the United States in their economic rather than their physiographic aspects. It is apparent that this plan is not the usual one but there are good reasons which support it. agree that the primary facts and ideas must be acquired through observation in the study of home geography. By following the synthetic plan the pupil first deals in a systematic way with life and conditions most nearly like his own and therefore better It starts with the very parts of geography understands them. in which he is most interested and with which he should be most familiar. It aids the imagination to a better conception of the comparative size of the geographical divisions and of the earth. It fixes early in the course the relations of the political divisions most important for him to know. Finally, it follows out the plan with which all courses begin and applies the educational maxim, "to proceed from the known to the related unknown." But someone suggests that we should go "from the whole to the parts." But this maxim is not violated unless one insists that the earth is the only geographical whole. In all our geographical thought and study Massachusetts, New England, the United States, North America, etc., are regarded as wholes much more

frequently than the earth itself. Moreover, by the above plan the study of the earth as a whole comes at the end of the fifth grade; in the sixth, the analytical study in detail begins.

During the first three years the instruction should be objective for the purpose of teaching the primary facts and ideas of the subject, it should be very simple and should deal with such topics as the physical features of the earth as they appear in the vicinity of the school; direction and distance; seasons and climate; the people, their physical characteristics, child-life at home and elsewhere as represented by pictures and stories; local food materials and the methods of raising and preparing them; clothing materials, their preparation and seasons of use; the homes of the people, the materials, forms and construction; local occupations; modes of communication and lines of travel and trade; the local animal and plant life and their uses to man; local history. In the third year the field of study should include the whole city or town and the county.

The next three years should be given largely to descriptive geography with the aid of text-book, globe, maps, pictures and supplementary reading; the state, New England, the United States and North America receiving chief attention.

During the next two years industrial and comparative geography should be emphasized. A thoroughly scientific course in physical, commercial and mathematical geography should not be attempted in the grammar school. It belongs in the high school.

The following outline indicates the field of work for the several grades, beginning with the fourth:

- FOURTH.—The city and the county briefly reviewed, the state and New England. Simple lessons upon the local, county and state governments.
- FIFTH.—The United States, the continents in brief outline and the earth as a whole. Use the globe constantly in the study of the earth as a whole. Simple lessons upon the national government.
- Sixth.—The earth as a whole reviewed, introducing little of astronomy or of mathematical geography; study the continents as wholes, noting regions of extremes or of special products and emphasizing the characteristic features. Retrace some of the historic voyages.

SEVENTH.—A detailed study of the United States and its possessions, and of North America. Teach the outline of the national government.

Eighth.—Complete the study of the other continents and their primary political divisions, including a comparative study of the continents and of the most important countries of the world, and tracing a few of the great routes of commerce. Teach in a simple way the origin of the earth and its relation to the solar system, its movements and their effects.

The present tendency is greatly to overload the course in geography, to carry the instruction beyond the grasp of the pupils and to give so much time to some phases of the subject that others of importance receive scant attention. A few years ago physiography was the chief topic; today it is life. change is a decided improvement is readily conceded, but what is needed is a well balanced course in which every subject receives appropriate consideration. The test of the importance of a geographic fact is its relation to man—the degree to which it affects him favorably or unfavorably. In geography, as elsewhere, the importance of a thing is often in inverse ratio to its size. Applying this test it appears at once unnecessary and unwise to teach the names of all mountains, islands, capes, rivers, and bays, or even of all cities and towns. Instead of a smattering of knowledge about many it is better to have a real knowledge of a few types which represent all,—to study carefully a typical mountain, river, farm, mine, fishing village, manufacturing town, commercial city, etc.—after that only the exceptional qualities in a comparatively few cases need be noted. there are about a hundred or two geographical names which should be memorized, and, beyond that, what names should be learned depends in part upon where one lives and in part upon current events. The great waste of valuable time and energy which has been so common should be avoided. That part of the work which taxes the memory chiefly is better adapted to the lower grades while that which demands more reasoning is better suited to the higher grades.

During the study of local geography the pupils should be taught map drawing and map language — how to represent the various physical features upon paper. They should draw maps from nature and also from memory to test the accuracy of

their observations. From the fourth grade up, the wall map takes the place largely of the earth's surface. From it the pupils must learn how to gather the facts previously learned by exploration. The facts of position, surface, climate and drainage should generally be developed by careful questioning from the map before sending the pupils to the descriptive text. Little time should be used in elaborate maps from copy or by use of construction lines, but, in the fifth and sixth grades especially, freehand map-drawing after the following plan will prove a profitable exercise: — Let the pupils look at a correct map for one minute, observing the general shape and relative dimensions; then remove the map and allow one minute in which to draw the outline: then let the pupils compare for one minute their drawings with the map; again remove the map and allow a minute for corrections: once more present the map a minute for comparison and allow another minute for correction. During these six minutes the pupils will have secured a much more definite mental picture of the outline of the continent or country than by the usual method in a much longer time. A few repetitions of the process will enable them to draw very creditable maps from memory. Upon these outlines may later be indicated such rivers, mountains, cities or other objects as may be desired.

It is not supposed that the teacher will confine himself to the matter in the text-book nor always follow the order there given. Much supplementary matter is needed and many topics for individual reports should be assigned. In order that no important topic may be neglected it is necessary, for most teachers at least, to have an outline of topics before them. The following list will be found logical in arrangement and not too full of details. It is merely suggestive, leaving to the good judgment of the teacher where the emphasis should be placed, what sub-topics should be expanded or omitted in each case:—

Topics for the Study of a State, Country or Continent

Position. — Relative to what has already been studied, to the equator and the zones.

Surface. — Form, relief, coast, comparative size, islands.

CLIMATE. — Winds, temperature, moisture, healthfulness, peculiarities.

- Drainage. River basins and systems, important rivers, lakes, etc., peculiarities.
- Soil. Fertile or sterile (where and why) minerals, stones.
- Life.—1. Vegetable—Forests (characteristics and uses) grasses, grains, fruits.
 - 2. Animal Wild and domestic (characteristics and uses.)
 - 3. People Physical characteristics, manners and customs, education, religion, government, centers of population.
- Occupations and Productions. Materials, processes and uses.
- Commerce. Exports, imports, commercial centers, land routes and water ways.
- History. Always associate great historic events and famous persons with the appropriate places. Current events should furnish in every grade many occasions for special but very profitable geographical study.

THE WASHINGTON SCHOOL

The historical facts incorporated in this sketch were furnished by ex-councilman Arthur W. Newcomb who seems to have examined the records with much care.

In 1808, William Adams of Hopkinton gave to Quincy Point its first public school lot. In the deed he says, "In consideration of the love and respect that I have for the Old Fields District—I give—a certain piece of land for the use and sole purpose of being improved for a schoolhouse lot." The piece contained forty-six square rods and seems to have been the central portion of the Washington school lot before the recent enlargement.

In 1829, additional land was purchased of Isaac Riddle for forty dollars. The same year the town of Quincy built a new and larger schoolhouse for this district. The old building was moved to the corner of Washington and South streets where it still stands although somewhat changed and enlarged. The new house was built by Joel P. Deadman for five hundred twenty-three dollars, including the foundation. Later the building was enlarged by raising it and placing a story beneath.

The beautiful elm trees which add so much to the appear-

ance of the school grounds and of which the people of this district are justly proud, were set out in 1840.

In 1858, another addition was made to this school lot on the south easterly side by purchase from Daniel Baxter at a cost of one hundred dollars. The old building was removed to a point on Washington street opposite South where it is still used as a dwelling house and a new two-story building was erected at a cost of \$7,634.05.

In 1874, the school accommodations in this district were further improved by raising the building and placing a story under it, making a three-story building. These changes were in charge of James H. Slade, a member of the School Committee, and Col. Francis W. Parker, Quincy's first Superintendent of Schools. The improvements cost \$3,374.38.

Still the demands for larger and better school accommodations in this district increased and in 1901 the lot was greatly enlarged by the purchase of land fronting on Curtis avenue and Washington court and costing \$6,488.10. Some months later plans for a new building prepared by Albert H. Wright, architect, were accepted and the contract let.

In October 1903, the new Washington school was completed. It is a handsome and substantial two-story brick structure with granite trimmings. There are five classrooms and the Principal's office on the first floor, and five classrooms and the teachers' room on the second. Unfortunately there is no assembly hall. Nevertheless it is a very convenient and well equipped school building, modern in every respect and the best in the City. It cost including the furniture, furnishings and grading the lot \$55,000.

On Tuesday, October 20, the teachers called their pupils to order for the first time in the new building and on the following Friday afternoon appropriate but informal dedicatory exercises were held, a large number of parents and citizens being present.

Through the enterprise of Thomas B. Pollard, the popular and efficient principal of the school, and the generosity of many friends, the rooms and corridors of the building are adorned with the following works of art:—

Casts

Boys Playing Trumpets, by Della Robbia; gift of Frederick H. Smith.

Signing the Declaration of Independence; gift of Mrs. Thomas A. Addison.

Singing Cupids, by Giovanni da Bologna; gift of Mabel Shaw Pfaffmann.

Night, by Thorwaldsen; gift of Eugene R. Stone.

Morning, by Thorwaldsen; gift of Mrs. F. S. Barry.

Children Playing on Instruments, by Della Robbia; gift of Edwin S. Beckford.

Fragment of Triumph of Alexander, by Thorwaldsen; gift of Mrs. Eva Hall Fryer.

Bust of Washington, by Houdon, with bracket; gift of Marcus E. Wight.

Photographs

Aurora, by Guido Reni; gift of Joseph L. Whiton.

Dance of the Nymphs, by Corot; gift of Joseph A. Dasha.

Parliament building in London; gift of John Shaw.

Capitol at Washington; gift of George A. Sidelinger.

Old Ironsides, by Marshall Johnson, Jr.; gift of Esther and Hazel Crowley.

Pictures of the Yosemite Valley; gift of Mrs. Slade, in memory of James H. Slade.

St. Peter's Cathedral; gift of Mrs. Julia A. Tracy.

The Seven-masted Schooner, Thomas W. Lawson; gift of Howard P. Elwell.

The Thomas Crane Public Library; gift of Alice G. White.
The Golden Stair, by Burne-Jones; gift of Lillian M.
Dearborn.

Madonna of the Chair, by Raphael; gift of Class of 1903.

Christ Blessing Little Children, by Plockhorst; gift of Mrs. Thomas A. Addison in memory of her niece, Miss Lucy W. Brown, a former teacher in the school.

Automedon and the Horses of Achilles, by Regnault; gift of Frederick Morton Smith.

St. Paul's Cathedral; gift of Mrs. James H. Slade.

One of California's Giant Redwoods; gift of Daniel Higgins.

Old Schoolhouse at the Neck; gift of Arthur W. Newcomb. Twenty-three Perry pictures, large size; gift of Mrs. Jessie E. Lee. The following were purchased by a fund raised through the personal efforts of Principal Pollard:

Bust of Longfellow, by Brock; with bracket.

Sir Galahad, by Watts.

York Cathedral.

A Reading from Homer, by Alma Tadema.

Photograph of a lion, taken from life.

Dignity and Impudence, by Landseer.

On Saturday, December 26, the old building which had served its high purpose so many years was sold at auction for one hundred ten dollars, to be torn down and removed within three months.

STATISTICS

The dividend includes every cent the Board has spent from January 1 to December 31, excepting \$1,530.22, the cost of maintaining the evening schools.

The divisor is (1) the whole number of different pupils, 5,676; or (2) the average number belonging, 5,112; or (3) the average daily attendance, 4,705. All three of these divisors refer to the school year, September, 1902, to June, 1903.

Cost:-1. \$19.32 + 2. \$21.45 + 3. \$23.30 +

^{*}Does not include Special Teachers.

mentary schools.

‡This number includes the teacher of cooking although but twenty lessons are given

during the year.

Seventeen teachers have resigned during the year.

Two have been absent on leave.

Seven have attended a normal school but did not graduate.

Fifty-two have graduated from a normal school.

Nine have attended college but did not graduate.

Twelve have graduated from college.

Average salary of all teachers in the first eight grades (not including principals,) \$481.41.

Average salary of all teachers in grades IX, X, XI, XII, (not including Head Master,) \$767.57.

Minimum and maximum salary of principals: Grammar, \$1,000—\$1,400; High, \$1,800—\$2,200.

EVENING SCHOOLS

The following report of the evening schools covers the period from October, 1902, to January 1, 1904, or two terms of these schools, one from October 20, 1902, to January 30,1903, and the other from October 19, to December 8, 1903. Hereafter the period covered by the reports will coincide with the fiscal year.

Two common schools and one Evening Drawing school were maintained.

The teachers of the Adams school were James M. Nowland, principal, the first term, and Winthrop N. Crocker, the second, Thomas B. Pollard, Minnie E. Donovan, Ida J. Cameron, Josephine L. Kelley and Jennie F. Griffin.

The whole number enrolled was 220—men, 184; women, 36. The average attendance was 94.26; and the average number of teachers was 5. The school had 62 sessions.

The Willard school was in charge of Austin W. Greene, principal, and Charles Sampson, Charles H. Taylor, Frances C. Sullivan, Catherine McGovern, Ellen G. Haley, Annie E. Burns, assistants.

The whole number enrolled was 302—men, 285; women, 17. The average attendance was 101.2, and the average number of teachers was 6.2. The school had 62 sessions.

Miss Flora M. Shackley was in charge of the Evening Drawing school. The school was in session six evenings a week, three evenings being given to mechanical drawing and three to free-hand.

The total enrolment in the mechanical class was 61—men, 60; women, 1. The average attendance was 28.7. The number of sessions was 47. The total enrolment in the freehand class was 23—men, 21; women, 2. The average attendance was 11.36. The number of sessions was 49.

The attendance at the evening schools is usually very good up to Christmas, but falls off rapidly and is quite irregular after the holidays; therefore, it seems advisable to open them earlier in the fall, to have four sessions a week instead of three and to close them the last of December. In this way the same number of sessions would be provided, the work would be concentrated, the interest maintained and the expense somewhat reduced.

The number of sessions of the Evening Drawing school

should be reduced from six to four a week in order to divide the expense more equitably among the schools.

Most cities and towns require a small deposit, fifty cents or a dollar, from each person attending their evening schools. The deposit is made at the time of registration and is returned at the close of the season to all who have complied with the conditions prescribed by the School Board, which usually are that each pupil shall attend at least fifty per cent. of the sessions, unless excused for satisfactory reasons, that all school property lent the member shall be returned in good condition, and that his conduct has not been such as to render his presence injurious to the school.

Under the present arrangement a large number enter the evening schools apparently without any serious intention of doing any work. Some come two or three times through curiosity, or as it would seem, for the purpose of disturbing the school. Where a deposit is required these classes are largely eliminated. They do not enter and it is best for all concerned that they should not. The deposit is simply a guarantee of good faith.

NAMES FOR THE PUBLIC PLAY GROUNDS

During the spring term of 1902, the Board of Park Commissioners of the City of Quincy invited the pupils of the public schools to suggest appropriate names for the various play grounds in the city. A large number of lists were sent to the Commissioners, who, after careful consideration, decided that the following named pupils suggested the most appropriate names, and last May awarded to each of these competitors a copy of Wilson's "Where American Independence Began" as a prize: Enoch Fuller of the Gridley Bryant school; Mary Doyle, Thomas Doran and Katherine McDonald of the John Hancock school; Charles M. French and Margaret Carey of the Washington school; May Williams, Blodwin Walters and Etta McDonald of the Willard school.

Respectfully submitted,

December 31, 1903.

FRANK E. PARLIN.

Quincy High School

Mr. Frank E. Parlin, Superintendent of Schools:

It gives me pleasure to submit, in accordance with custom, the following report of the Quincy High School for the year ending December 31, 1903.

The year has been marked by an earnest effort on the part of the pupils and of the teachers to maintain a high grade of scholarship under difficult conditions. The loss of seven teachers and the use of many substitutes during the fall term of 1902, seriously weakened the discipline and reduced the daily attendance during the earlier part of the year. Since that time, however, the spirit of good deportment and of hard work has pervaded the school, producing commendable results.

An interesting as well as pleasing indication of the desire for more education inspired by the school is seen in the increased number of those who enter for a business certificate and remain to graduate, of those who return for graduate work, and of those who enter college. During the past five years, two hundred and forty-eight diplomas and one hundred and eighty-seven certificates have been awarded as follows:

1898-99, 41 diplomas and 42 certificates. 1899-00, 46 " " 41 " 1900-01, 49 " " 42 " 1901-02, 52 " " 33 " 1902-03, 60 " " 29 "

Besides a large number who are taking work in the various schools for domestic science, physical culture and elocution, there are forty-three graduates of this school attending higher institutions of learning. They are distributed as follows: Boston College, one; Boston University, nine; Brown, two; Mount Holyoke, one; Radcliffe, four; Harvard, five; Wellesley, two;

Dartmouth, one; Massachusetts Institute of Technology, four; Simmons, eight; and Bridgewater Normal School, six.

The quality of the work at the High School has always compared favorably with that done in other cities. The preparation for college, for business and for other pursuits has met with approval; but the overcrowded buildings and the lack of recitation rooms are working irreparable injury to the pupils. A school of six hundred pupils ought to have, at the least, seventeen recitation rooms, one large study hall or several large classrooms, and In the old and new buildings together, there a drawing room. are but eleven recitation rooms, two laboratories, one study hall and one drawing room—seven rooms less than are required. will be noted that a gymnasium, assembly hall, library and rooms for manual training and domestic science are not included; and yet, all of these are considered necessary in giving a well rounded secondary education. To meet this lack of recitation rooms, as has been stated in previous reports, corridors, entries and other makeshifts have been pressed into service. These are unhygienic, because they are unventilated, poorly heated, and improperly lighted. One of the chief purposes of the recitation is to develop in the pupil the power to think. If the conditions of the recitation oblige him to waste attention in trying to overcome physical discomfort, then undivided interest, close application and clear thought are impossible, the quality of his work is impaired and the quantity reduced. The school continues to increase rapidly in numbers. The average rate of growth, during the past five years, has been thirty-seven. At present, the total enrolment is sixty-three and the average daily attendance fifty-three larger than last year. All of these facts, as well as those previously stated, prove that the need for adequate accommodations should receive immediate consideration and that additional room should be provided before the opening of another school year.

The science department has been developed and broadened during the past four years. Seven courses, each extending over forty weeks, are now offered. They are known as science I, II-A, III-B, III-A, III-B, IV-A and IV-B. The Roman numeral indicates the year when the course is first open to the pupils.

Science I may be taken by any pupils of the school. During

the fall and winter, the subjects are physiology and hygiene. The pupils are taught the functions of the organs of the body, the laws of health, the application of these laws to daily life, and first aid in common accidents and emergencies. In the spring the functions of flowering plants are studied, together with their adaptation to surroundings, and their uses to man. The structure and modifications are examined and the stages in development shown by drawings.

Science II-A, biology, follows in the second year and takes up the anatomy, physiology and hygiene of both animals and plants. The general purpose of the course is: first, to arouse interest in the work by studying and comparing the more simple and less conspicuous forms; second, to study certain divisions for finer relations and for changes in development, working from simple to complex forms; and third, to study animals and plants in their relations to man. Although no regular textbook is used, reference books are consulted frequently throughout the course. The following outline shows in part the specimens studied:

1.—Animal Forms:

- 1. Protozoa: amœba and vorticella.
- 2. Mesozoa: volvox.
- 3. Metazoa:
 - a. Porifera: sponge.
 - b. Hydrozoa: hydroid.
 - c. Actinozoa: coral and sea-anemone.
 - d. Echinodermata: starfish, seaurchin, and sand-dollar.
 - e. Vermes: earthworm.
 - f. Mollusca: oyster, clam, scallop, snail and squid.
 - g. Crustacea: lobster, crab and barnacle.
 - h. Myriapoda: centiped.
 - i. Arachnozoa: scorpion and spider.
 - j. Insecta: locust, cricket, dragon-fly, cicada, beetle, house-fly, butterfly, moth, bee and ant.
 - k. Vertebrata: fish, snake, frog, turtle, and common birds of Quincy.

II.—PLANT FORMS, Flowerless:

- a. Bacteria.
- b. Blue green algae.
- c. Algae: green, red, brown.
- d. Fungi: yeast, moulds, toadstools, and pore fungus.
- e. Lichens.
- f. Mosses.
- g. Ferns.

Science II-A is an elementary course in physics offered to all pupils except members of the entering class. The subject readily divides into three parts: first, mass-physics, treating of matter and energy, from which the pupils learn the properties of matter, the laws of motion and the effect of gravitation upon falling bodies; second, molecular-physics or heat; and third, aether-physics, under which are included light, electricity and magnetism. Individual experiments are performed, simple problems solved, mechanical applications of the laws made and natural phenomena explained.

Science III-A follows in the third year and is open to pupils who have shown special aptitude for science II-A or who are preparing for higher institutions. It is an advanced course in physics, consisting largely of experimental and mathematical work. The experiments require careful manipulation of sensitive apparatus, and close observation for long periods of time; while a thorough knowledge of the physical laws, together with the ability to think clearly are demanded by the mathematical problems.

Science III-B, chemistry, is offered in the third year. It deals with the atom, instead of the mass, and requires some knowledge of the physical laws. A careful study is made of the common inorganic elements, both metallic and non-metallic, and of their compounds. A few of the more prominent organic compounds are included in the work. The fundamental laws of chemical action, electrolytic dissociation and mass-action are explained and simple examples in stoichiometry solved. The laboratory work is mainly qualitative and deals with the preparation and testing of the properties of the elements and their compounds.

Science IV-B follows in the fourth year and is open to pupils who have showed the ability to undertake advanced work in chemistry. The analytical reactions of the salts are tested, the metalic elements are divided into groups, and a system of separating the metals into groups worked out. The pupil is also taught how to determine the metallic and non-metallic parts in unknown salts and to find the composition of various alloys.

Science IV-A, physiography, is open to members of the senior class. In this course, the structure, physical features and climate of the various parts of the earth are studied and the action of the forces which change the surface and make it suitable for the home of man, are discussed. The properties which distinguish rocks and minerals and make them useful and valuable are learned by a study of specimens. Field lessons are conducted to examine structures in natural positions, to study the work of destruction due to atmospheric and other forces, and to note the deposition of various materials by the agency of water. A brief study of historical geology is made.

Science I, II-B, and IV-A are conducted under great disadvantages. The work ought to be done in a laboratory equipped with special desks for the pupils, with apparatus for growing and watching the growth of animal and plant forms, and with cabinets for specimens and instruments. At present, it is necessary to use a recitation room fitted with ordinary desks and with no place for the storage of specimens and instruments. In the near future, a well-equipped biological laboratory ought to be provided for the school.

A school garden, where practical application of the study of plants could be made, would improve the work in science I and II-B. Only a small piece of land and very simple tools would be required to teach the principles underlying the growth of plants, and the elements needed in the soil and air. Such a garden would awaken a greater appreciation of the value of plants to man from an economic as well as from an aesthetic point of view.

The purchase of two or three additional compound microscopes, of a stereopticon and of a three or four-inch telescope would prove helpful and valuable in broadening further the work of the whole science department.

Many pupils who attend school eat little or no breakfast. The reasons they give for not eating are: first, the early hour of opening; second, the distance to school; third, failure to wake in time; fourth, lack of appetite; and fifth, habit. Some bring a lunch to be eaten during the recess; others go to neighboring stores to buy cake, pastry and candy; while a few wait until they return home in the afternoon before eating. The physical condition of such pupils does not fit them for prolonged mental effort. Much of the poor school work is due directly to improperly or poorly nourished bodies. In many cities, some competent person, under the direction of the school authorities, serves a lunch at the intermission. A small price amounting to a few cents to cover the cost, is charged each pupil. On different days are served such dishes as creamed fish or chicken, eggs, soups, sandwiches, crackers, light puddings, fruits, cocoa and milk. Such lunches are easily assimilated and do not require much blood for the processes of digestion. This does not prevent pupils bringing lunches from home nor does it compel them to purchase at school. It simply provides an opportunity, for those who wish, to buy a lunch at a very reasonable price. If it seems wise to take action in this matter, the counter and corridor in the basement can be used for this purpose.

During the past few years, about half of each entering class has taken Latin, while the remainder has omitted language study other than English. For this reason, it seemed best to offer a second foreign language, French, as an elective. The large number who chose the subject in September, has proved the wisdom of the action; for, in addition to the usual number who took Latin, about thirty per cent elected French, making nearly eighty per cent of the freshman class studying both English and a foreign language.

For several years the school has received the benefit of the Rock Island Fund, the money having been expended for reference books. It would be of great help to the pupils, if some room in the building could be set aside where these books could be collected together for reference work. Under the present system, they are scattered throughout the rooms of the building under the care of the teachers of the various departments and they are available only to the pupils of those departments.

If a reading room or library were provided, the pupils could use it during study periods for reference work and supplementary reading and learn how to consult books. It would be wise in the addition to the building, to provide a reading room.

The school has received several valuable gifts during the year. The Class of 1903 followed the example of its predecessor and showed its appreciation of the educational advantages it had enjoyed by the generous gift of two beautiful pictures, handsomely framed. They were The Emperor Augustus of Rome and The Theseum at Athens. Golden Rod Managers of the Graduate Class of 1902 also generously presented the school with two framed pictures, The Colosseum at Rome and The Acropolis at Athens. An illustrated History and Origin of the Stars and Stripes in an ornamented frame was received from the ladies' of Paul Revere Relief Corps No. 103. The school is also indebted to Mr. F. A. Skinner for a large photograph of the Football Team of 1902 and to Mr. H. O. von Schuckmann for a facsimile of the Declaration of Independence.

The members of the class of 1903 are distributed as follows:

Graduate work in H	ligh	scho	ol	•	9
College	•	•	•		7
Other schools .			•		8
Boston Normal Art	•	•			1
At work in Quincy		•	•		11
At work in Boston	•	•		•	14
At home	•	•		•	10
Total	•	•		•	60

In closing, I wish to thank the members of the Committee, the Superintendent and my assistants for their continued support and hearty cooperation.

Respectfully submitted,

CHARLES F. HARPER,

Head Master.

Report of Truant Officer

To Frank E. Parlin, Superintendent:

I herewith submit my sixth annual report as truant It may appear to some citizens that, at the present time when so much money is appropriated for educating the children, and the opportunities to obtain an education are so great, there must be very little work for a truant officer. glance at the following table will show seven-hundred fifty-eight cases of non-attendance investigated, one hundred thirty-six of which proved to be truants—an increase over last year. Quite a number of the parents of these children, I found to be anything but friendly to the schools; and as I note the attitude of these parents, and glance at the home life, I wonder oftentimes, that there are not more children classed as truants and non-attendants. I can say from experience that the only moral teaching many children receive comes from the school life. Altogether too many children are turned loose upon the streets. A vigorous enforcement of the law is the only means to cure this condition of affairs, and this should be directed more toward the parent than the child. A large number of young fellows leave school at fourteen years of age, and instead of applying themselves to earning a livelihood become loafers. This class is on the increase in our city, and the law applying to them should be enforced.

My work brings me in close touch with the worthy poor of our city, and, through the response of generous citizens and means from other sources, I have been able to assist a large number of families.

I have mentioned some of the real, live issues in this report in the hope that it will arouse the best of our citizens to the condition of affairs. This will mean a public opinion that will demand the carrying out of the reforms needed. I desire here to express my hearty thanks to the superintendent and principals of the several schools for their many acts of kindness toward me in the discharge of my duties.

The following table shows in detail my work for the year.

TRUANT STATISTICS

1903.	No. of absences reported by teachers.	No. of parents or guardians notified.	Truancies determined by investigation.	Truants returned to school on day of truancy.	Children returned to school from street.	Tardiness investigated.	No. of manufactories or stores visited.	No. of children found employed contrary to law.	No. of employers notified.	No.of children placed before the court.	No. placed on probation.
